REPORT OVERVIEW. . .

The 20th edition of World Blockchain Summit – Singapore 2022 presented by Sedition and co-hosted by Sangkara, registered more than 1300 global blockchain, crypto and web3 industry under one roof to inspire and stimulate business opportunities through mutually beneficial collaborations across APAC.

The summit gathered elite leaders, solution providers, blockchain and crypto experts and investors from across the world to share their innovative, cutting edge solutions and projects with a wide range of participants from across the globe.

During the 2-day summit, more than 60 blockchain solution providers, crypto projects, investment partners and community partners showcased their offerings and were able to network and meet with qualified investors, buyers and other stakeholders to promote their offering, tokens and solutions proving how resilient the regional blockchain ecosystem truly is.

Apart from this, the summit also featured inspirational keynotes, pitch competitions, panel discussions, investor meet-ups, project showcases, industry use-cases and a host of formal and informal networking opportunities.

OPENING ADDRESS

The next frontier of the open web

Illiya's virtual presentation focused on the objectives of NEAR pushing for the vision of a world where all people would control their own assets, data and power of governance. The purpose of the presentation was to highlight the legibility of the project, how far the goals were and how they may be attained using simplicity, security and scalability.

ILLIA POLOSUKHIN | Co-Founder, NEAR Protocol

> *We still have massive progress to make in order to allow users to feel safer and it starts with an evolving decentralized governance".*

TECH TALK

Sangkara Misa – Leading in Tokenization and NFT Process

Agustino took to the stage to introduce Sangkara Misa. MISA token is the first token created by PT MSA to include a productive asset as a hedge of the token. He went on to further explain the purpose of Sangkara's vision and mission of creating a stable crypto market and allowing anyone to own digital assets safely and how it could benefit the farming ecosystem.

> *Sangkara can create an ecosystem that allows everyone in this room here to become a landowner of a plantation by buying NFTs"*

AGUSTINO WIBISONO | CEO, Sangkara Misa

FIRESIDE CHAT

Fostering the Asian crypto ecosystem

The fireside chat featured experts Hassan Ahmed and Adam Rubinsztajn both from Coinbase to discuss the crypto ecosystem and the overall sentiment within the space of the Asian market.

The chat went on double down on the institutional aspect of the ecosystem and how much of an impact its had in Asia over the course of the past few years. The panel further discussed aspects such as adoption of institutions in general as well as coinbase's plans into the future.

SPEAKERS:

HASSAN AHMED
Regional Director of Southeast Asia, Coinbase

ADAM RUBINSZTAJN
Institutional Sales, Coinbase

MODERATOR:

NICOLE NGUYEN
Co-founder, Duelist King & APAC DAO

TECH TALK

Sedition: The democratisation of art

Rory Blain took to the stage to talk about the origins of Sedition, an online art company and its prospects for the future. Rory went on to explain how sedition came to be and how the idea behind the initiative is to ensure the democratization of access especially in the case of art and how the power of blockchain could help achieve just that.

RORY BLAIN | Director, Sedition

> ***Blockchain is a historical game changer in the art world as it will allow you proper identification and ownership of what was previously an endlessly reproducible asset. Never before in history has an artist been able to guarantee that they will get a fair resale value of their work down the line."***

TECH TALK

Bolstering blockchain to power the future of Web 3.0

Haydn presented the history and purpose of Decentralised Investment Group. DIG focuses on investing in companies that build in the space of Web 3.0. Snape focused on the power of IP and went on to elaborate his experiences and how the market is down at the moment. He went to further explain how there's a lack of enthusiasm in the market today. DIG focuses on targeting big projects in entertainment and advise on how they could create token economic models for their business.

> ***Web 3.0 is where the industry is heading and where it needs to head in order to evolve to adopt and see the utility we expect to see in the future"***

HAYDN SNAPE | Founder and CEO, Decentralised, Investment Group (DIG)

FIRESIDE CHAT

The future of payments

The discussion of two focused on the relationship between Ripple and Tranglo. Keeping in mind that partnership and the future possibilities, the discussion went on to focus on how the power of crypto is disrupting and transforming the way we make payments today. The discussion also made note of the prospects of on-demand liquidity for cross-border payments.

SPEAKER:
LISA KIENZLE
Senior Director of Strategic, Projects, Ripple

MODERATOR:
MARCUS TAN
SVP of Business Development and Product, Tranglo

TECH TALK

Solving the trilemma utilising gasless blockchain technology

Alex Van Hulle led the presentation by introducing the summit to Redlight finance and Redlight chain: An initiative that aims to solve the Blockchain Trilemma of Scalability, Decentralization and Security through the optimization of our gasless blockchain. Alex's presentation focused on introducing revolutionary changes to the traditional EVM compatible blockchains. The idea

> ***Having a truly gasless blockchain means zero, and that means every single gasless transaction is zero. Zero gas means zero problems and that's amazing"***

ALEX VAN HULLE | Chief Technology Officer, Redlight Finance

TECH TALK

Banking and the metaverse - The future of finance

Bidyut began his keynote with the simple concept of happiness and went on to explain how this feeling is tied to context and how this context of happiness could be significantly altered with just a credit card and a laptop. His tech talk then focused on the differentiations between the reality we live in and the alternate reality that the metaverse builds on and how financial factors can also play a role in that experience and the involvement of DBS innovation within this space.

BIDYUT DUMRA | Executive Director, Head of Innovation & Ecosystems, DBS

> ***The concept of the metaverse is mind blowing to understand but is just as mind blowing as an opportunity."***

PANEL DISCUSSION

Defi and crypto: The bridge to the future of finance

The exciting panel took to discussing the concepts of Defi and crypto and the role they played in the future of digital finance. It began by going into detail in discussing The evolution of DeFi and its mechanics before moving on to the subject of the potential benefits of DeFi, from a traditional finance lens and making great comparisons between the two. It further went on to discuss the infrastructure pieces needed to be in place to support this adoption and how it could be achieved in the near future. It also shed a light on the Asian market including the trends we see in Singapore & globally.

PANELISTS:

DANIEL OON
Head of DeFi, Algorand Foundation

TAKATOSHI SHIBAYAMA
Head of Sales, APAC, Copper.co

BRIAN KUTTIKAT
Director for Business and Strategic Alliances, CoinDCX

MODERATOR:

NICOLE NGUYEN
Co-founder, Duelist King & APAC DAO

TECH TALK

How to fix stablecoins - gold tokenization in the world's highest capacity vault and beyond

Gregor went on to introduce Cache Gold before moving to the presentation where his concept was to compare the current state of gold appreciation vs FIAT (USD, Euro) depreciation.

He then proceeded to explain the logistical and technical infrastructure for an open gold ecosystem within the scope of blockchain and a Proof of Reserve with CACHE / Chainlink APIs globally. The idea behind the presentation was to bridge gold and cryptocurrency liquidity.

GREGOR GREGERSEN | Co-founder, CACHE Gold

> ***Because we have a background in gold and in vaulting and technology, we've been able to build something that is quite unique in the industry"***

PANEL DISCUSSION

Market outlook: Investor's panel

This start-studded panel focused on the investor perspective in the blockchain market. The panelists discussed the prospect of investing in Web 3.0 and its implications along with the future of the Internet and the role it will play in the market.

They also discussed the current status and the bear market being different from the past. The panel didn't shy away from discussing the future as well by dwelling deep into the prospect of NFTs, the metaverse & blockchain gaming.

PANELISTS:

TOBIAS BAUER
Principal, Blockchain Founders Fund

HAYDN SNAPE
Founder and CEO, Decentralised Investment Group (DIG)

ANJU PATWARDHAN
Managing Partner, CreditEase Fintech VC Fund

BEN WEE
Vice President, Crypto.com Capital

MODERATOR:

CHARLES KOK
Director, UOB Venture Management

OPENING KEYNOTE

The sustainability of smart contract platforms

Daniel conducted his keynote by bringing in the concepts of smart contracts within the scope of investments. He went on to further define the current trends in investments before talking about the actual concepts of smart contracts. He then went on to further discuss the sustainability aspect of these contracts and their viability as a whole.

DANIEL LIEBAU | Chief Investment Officer Modular Blockchain Fund at Modular Asset Management

> *It's important to look at the sustainability characteristics of such platforms because they're not always companies. Therefore, we need to assess them in a different fashion."*

KEYNOTE

The internet computer: Web 3 in its purest form

Jan began by introducing Dfinity and its mission to contribute to the internet computer. Jan then proceeded to take the crowd through the forms of Web before exploring the various prospects of Web 3.0.

He elaborated the benefits of it before advocating that the most important aspect of it would be the idea of ownership and that online services will run 100% from the blockchain in the future.

> *It's important that the DAO, the token and the dapps are all hosted on the blockchain and are all unstoppable and in control."*

JAN CAMENISCH | CTO, FINITY Foundation

SPECIAL GUEST KEYNOTE

The Indonesia crypto market insight

Presented by H.E. Dr. Jerry Sambuaga, he provided great insights into the Indonesian crypto market, what its current state is and where he predicted it to go next. He presented a vision for Indonesia in this regard for it to become a digital economy powerhouse for inclusive, connected and sustainable economic growth through a 5 goal strategic process.

> ***I urge and I also recommend all of us that not only traders, not only exchangers, have to see the possibility of the future and how to integrate and create a good and supporting ecosystem for all stakeholders. And I believe we can do so."***

H.E. DR. JERRY SAMBUAGA | Vice Minister of Trade Republic of Indonesia UP

TECH TALK

Introduction to solidus AI tech

The virtual presentation was conducted by Paul Farhi and sought to introduce the audience to Solidus AI tech. Pauls presentation took us through the origins and history of the company and how it is building an eco friendly high performance computing IaaS platform where governmental authorities, megacorps, SMEs and professionals would be able to purchase AI services seamlessly via its AITECH token.

PAUL FARHI | Founder & Head of UK Operations, Solidius Ai Tech

PANEL DISCUSSION

Digital assets sector: What to watch for in 2022

The panels main objective was to shed a light on the upcoming trends of the digital assets sector and what the prospects were for this year and possibly even beyond. It tackled discussion points that included the idea of digital assets itself from its fringe beginnings to future possibilities, the prospect of building better infrastructure for digital assets and future support and even touching up on the subject of what was next for stable coins & Defi.

PANELISTS:

FEROZE MEDORA
Director of Trading, Gemini

ANSHUMAN ASTHANA
Head of Post-Trade Marketnode

MODERATOR:

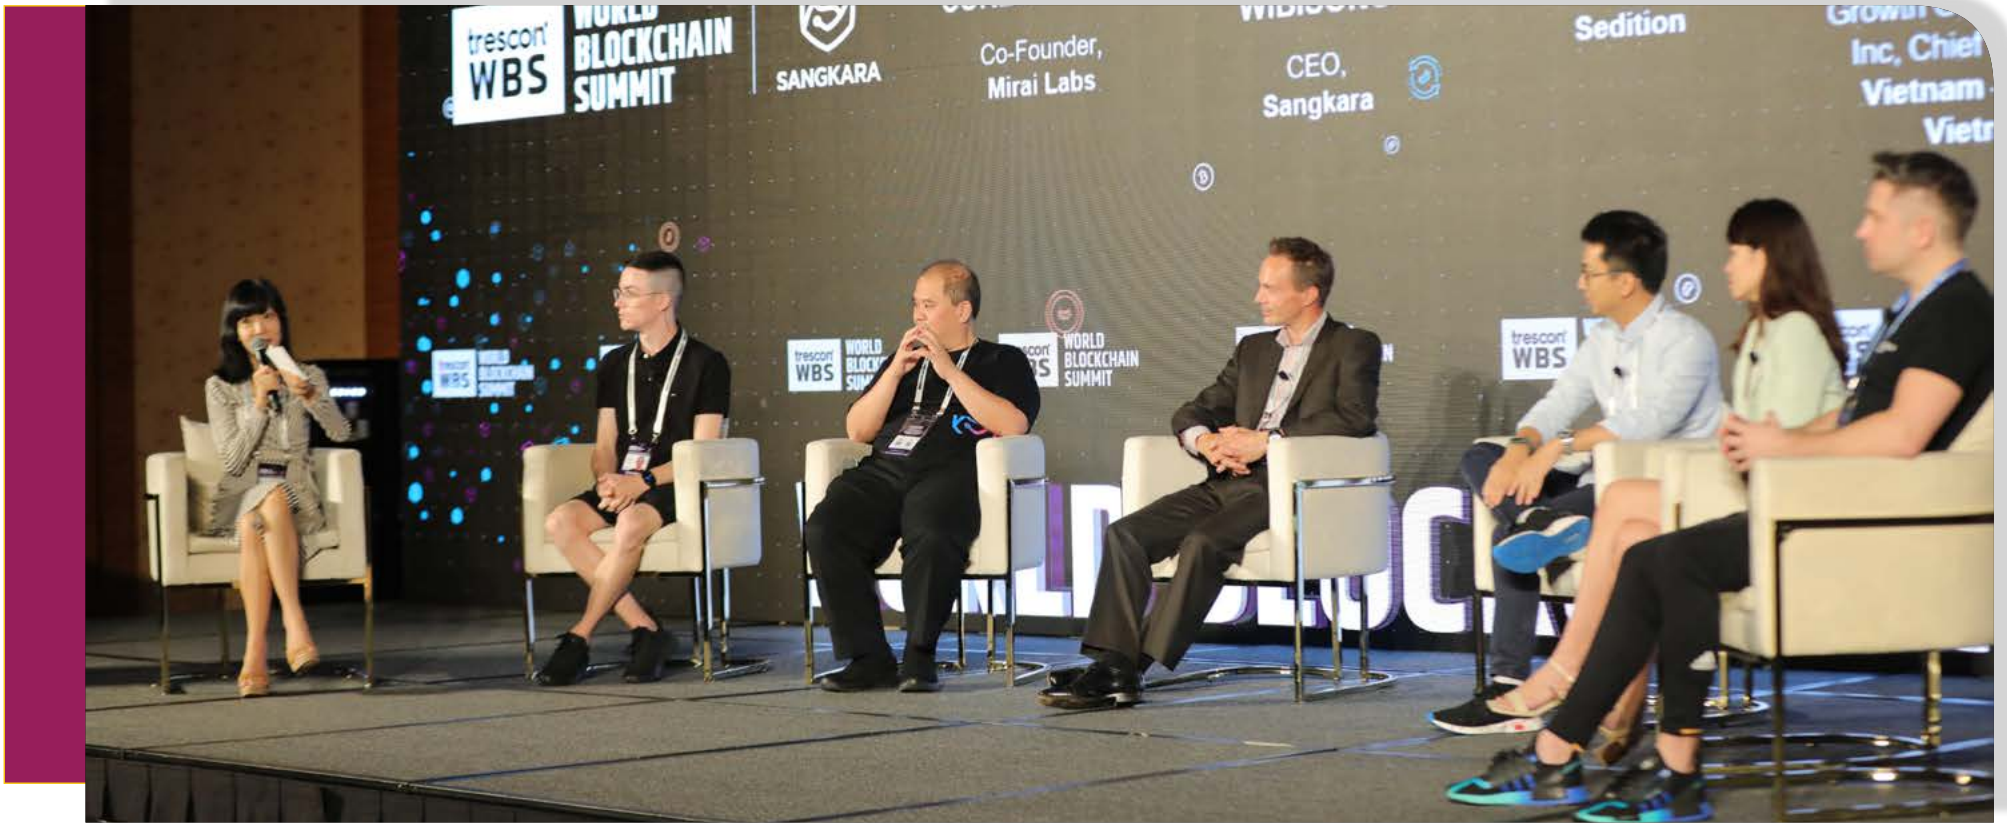

ALEX MUKHIN
Co-Founder and Managing, Partner at Cryptomeria Capital, ex COO at Cointelegraph

PANEL DISCUSSION

Metaverse, NFT and the future of virtual economy

Another star studded panel, it dwelled deep into the concepts of NFTs, the metaverse and blockchain in gaming.

The panel discussed the future of NFTs and how they would shape the metaverse for better and worse and how the community was important in playing a role in that. It went on to further discuss how gaming is now playing a key role today and whether its role in the metaverse was the next frontier for progress in the market. The panel also discussed how NFTs could be used for good in unlocking new value in new markets and how they were changing the game for artists and creators worldwide.

PANELISTS:

COREY WILTON
Co-Founder, Mirai Labs

AGUSTINO WIBISONO
CEO & Founder, Sangkara

RORY BLAIN
Director, Sedition

CRIS D TRAN
Co-founder, Chief Growth, Officer - M3TA Inc, Chief Strategy, Vietnam – Huobi Vietnam

EE LING, LIM
Executive Director, Global Programs - 500 Global

DANIEL MULLER
CEO and Co-Founder, ProtoReality Games

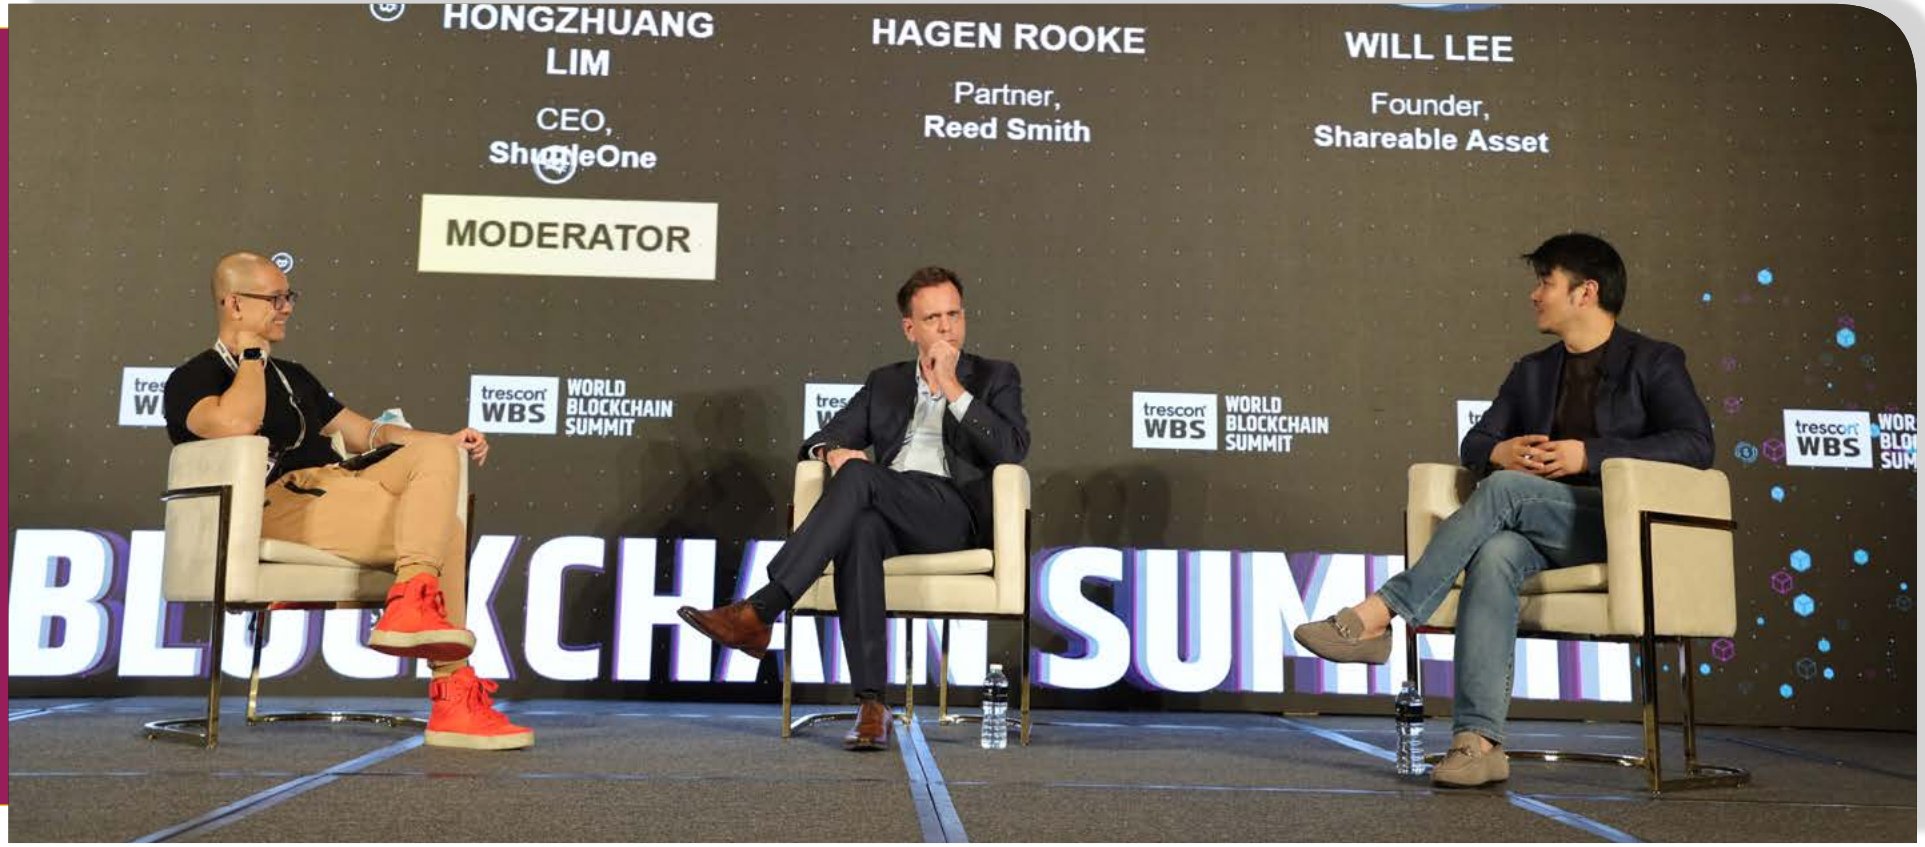

MODERATOR:

CECILIA WONG
Founder, yourPRstrategist

PANEL DISCUSSION

Fostering the Asian digital asset ecosystem

The final panel discussion of the summit focused on assessing the latest developments in blockchain, digital assets and CBDCs over the past 12 months and delving into some of the specific challenges to implementation and adoption. It further went into the policy environment for blockchain Innovation and adoption discussing the possibilities and what the road to mass adoption would be like in the future. After many exciting discussion points, the panel wrapped up by deliberating how blockchain supports financial inclusion.

PANELISTS:

HAGEN ROOKE
Partner, Reed Smith

WILL LEE
Founder, Shareable Asset

DUMITREL LOGHIN
Research Assistant Professor, Singapore Blockchain, Innovation Programme (SBIP)

MODERATOR:

HONGZHUANG LIM
CEO, ShuttleOne

TECH TALK

What is CeDeFi and how will it influence the future of crypto market

Ilya's presentation sought to describe and discuss the idea of CeDefi, and its relatively new beginnings. He went on to further discuss the concept of "Yield" and advocated for the Cefi model and how easy it was to onboard for a retail user making similarities to a regular banking model. He further discussed points such as CeDeFi as a new trend in crypto and where the future of CeDeFi was going.

> *I've been hearing many questions about what Defi is. But today I want to talk to you all about a new concept called CeDefi and how I believe it's going to change the landscape of the crypto market."*

ILYA LETUNOV | Co-founder, Midas.Investments

TECH TALK

NFT art: How the future of NFTs will empower artists

Agustino once more took to the stage to educate the audience on the prospects of Sagkara Misa but this time, to explain its NFT. He proceeded to explain how Sangkara makes it easy for artists. He explained the benefits of Sangkara NFT and how it would also benefit the buyer as they'd be shipped the original artwork with no hassles. He shed light on how Sangkara NFT was the perfect platform that could help bring art workers and buyers together to conduct NFT sales.

AGUSTINO WIBISONO | CEO & Founder, Sangkara

> *I've met and spoken with many artists especially in Indonesia and I noticed that they need something, a platform where they can be seen."*

TECH TALK

Crypto market data, use cases and value proposition

Sean introduced Kaiko as the leading source of crypto currency market data, providing businesses with industrial grade and regulatory compliant data. He further explained how Kaiko is the expert in market data bringing knowledge to the crypto industry, solving fragmentation and how they were trusted by many financial institutions to help solve problems.

> ***We're in the business of being able to say to people, "here is something that is publisher transparent and therefore, something you can understand and reconcile with so as you trade, you have something to compare it to."***

SEAN LAWRENCE | Head of APAC, Kaiko

TECH TALK

How crypto assets are driving the future of finance in Asia

James' presentation focused on coinstore and prospects of stable coins being able to bridge the digital value. He discussed the birth of stable coin back in 2014 before going on further to discuss the rise in its value and what its benefits were in the long run. He further discussed the legitimacy of them and how there seems to be a mass adoption of them from financial institutions and banking companies.

JAMES TOH | Global Head of Business, Development, Coinstore

> ***If someone was to ask me what the best way was to look at stable coins, the safest way if you're not using them, would be to convert them into fiat currency."***

KEYNOTE ADDRESS

Hello Future: The trust layer of the internet

Mance's virtual keynote provided more insight into Hedera Hashgraph. The objective of the presentation was to dwell deep into the mass adoption of public ledgers. Mance went on to explain the challenge of early generations of public ledgers detailing the requirements for enterprise adoption before swaying in to Hedera's services as a whole and its use-cases.

MANCE HARMON | Co-CEO - Swirlds Labs, Co-Founder - Hedera

> ***Our tokenization makes it possible to do 80 oer cent of what you would normally do as a developer with a token but in the form of a native service rather than a smart contract."***

TESTIMONIALS

"So far at the event, I see many innovative solutions here from across the region and across the world. We have established contact, friendship and I think from there is where business is created"

Anthony Cole | Founding Member, Asia Blockchain Association

"It's an incredibly diverse crowd. It's a very professionally run event. Singapore is wonderful. We're over-enthusiastic tourists more than professionals, it's a wonderful place. The crowd here is phenomenal. It's got the gamut from artists, investors, NFT enthusiasts, blockchain specialists. It's a far more diverse crowd than I was expecting. We're here because we want to announce to the crypto and blockchain world that we're now stepping into this space."

Rory Blain | Director, Sedition

"From this event, I know many investors, many blockchain and token projects. The most important thing is networking. So here I get more opportunity to network to come together and grow together and getting stronger together in a blockchain tank."

Agustino Wibisono | CEO, Sangkara

"This was the first event we participated in and we met many people who are active in different sectors. We built some useful connections here and we can't wait to participate in the next edition"

Mazyar Torkpour | CEO, Prokey Technologies

"What I've noticed with this entire summit is that a lot of people are looking for innovation, what's next and what's to come especially in these types of markets. We've realised that having something such as our blockchain is allowing people to take that as a stepping stone to think about future projects, what can be possible due to this innovation."

Alex Van Hulle | CTO, Redlight Finance

"Overall the experience has been very good, I like the set up here. The whole event is organised very systematically. I think this is one of the better events that we have participated in."

James Toh | Global Head of Business Development, Coinstore

Startup World Cup Regionals – Winner

World Blockchain Summit also provided top startups a platform to exhibit their innovative capabilities in front of global investors at the Startup World Cup regionals. AmazeWorld, The world's first Web 3.0 travel platform with crypto payment facilities and rewards, won the pitch slot and took home the prize at Singapore. They will now get the opportunity to network with startups and investors at the Grand Finale of the Startup World Cup at San Francisco where they can once again pitch their project for a chance at winning a US$ 1 Million investment prize.
