25 - 26
MAY 2022

JUMEIRAH EMIRATES
TOWERS, DUBAI, UAE

World's Longest Running AI Show Series

EVENT REPORT

tresconglobal.com/conferences/ai/dubai

The 35th global edition of World AI Show & Awards, held under the patronage of the Private Office of Sheikh Saeed Bin Ahmed Al Maktoum, a member of the royal family of Dubai; was **conceptualized to give impetus to UAE's stake in the AI & RPA revolution.**

The Dubai edition of the longest running AI series, organized by Trescon, convened over **400+ attendees** that included major stakeholders including government authorities, top AI experts & solution providers.

It brought together the most powerful voices in the global AI and RPA space, to **talk about the changing dynamics of AI** and UAE's approach towards adoption and implementation of potential emerging technologies across the country's various industry verticals.

The 2-day event was dedicated to comprehensive keynotes, tech talks, panel discussions, pitch competition and the most-awaited World AI Awards – **all in all delivering top-notch curated content for AI and RPA businesses.**

Top 3 technologies in demand: Artificial Intelligence & Machine Learning, Blockchain, Cloud

Top 3 Challenges: Automation, Data security, Skilled resources

Dr. Anastassia Lauterbach

Managing Director EMEA,
The ExCo Leadership
Group

KEYNOTE

Democratizing AI

Anastassia started off by sharing her experience about how AI has become far more advanced, by giving audience an example of a particular AI which provided a continuation of Beethoven's 10th symphony even when all remained was a few fragments of the symphony before his death.

“

Decentralization on blockchain for me is a necessary tool which might bring us democratization of AI and the potential disruption that it can bring in the particular industry is about US\$ 0.5 trillion.

”

TECH TALK

Humanity in AI

In this enlightening tech talk, Noor shared his experience of 15 years and spoke about the importance of co-workers in every industry, where he shared insights on what 'not to do' in a technology company. Noor spoke about the motive of his company which is transforming data into intelligence for the betterment of humankind. He highlighted the challenges that were faced by his company and his co-workers and how they overcame it together.

“

4 out of 5 things that I learned to make a company successful are about humans, the people not the technology, not the tech they developed, not the AI they developed, not the machine learning, not the innovation, just the people.

”

Noor Alnahhas

CEO & Visionary

FIRESIDE CHAT

Transforming cities to autonomous mode

**SPEAKERS:****ANGAD SINGH**

Global Director
Innovation, Aramex.

DR. JASSIM HAJI

President, International
Group of Artificial
Intelligence

SEHAM EL BEHISSY

Former Digital &
Connected Cars General
Manager, Renault

MODERATOR:**MOBEEN KHAN**

Director PMO and
Business Operations
Sublime Enterprises LLC

In this fireside chat, panelists shared their insights about how to categorize different kinds of AI in different walks of life; to overcome the challenges that are going to arise as the world is going forward and the population is increasing.

The panelists shared some light on how bringing AI into the back-end decision making (which was previously done manually) is now being done by completely programmed AI which helped the industry in the pandemic by bringing flexibility to operations. Further to this, the panelist highlighted the challenges faced by users of autonomous vehicles and how using them will affect the environment.

Anand Veeramani

VP & Geo Head- Asia and Middle East, Happiest Minds

KEYNOTE

AI-powered Automation for Digital Transformation

Anand spoke at length about how due to the digital transformation, there has been multiple technologies, and with multiple ways of operation, how IT landscape has changed totally. He spoke about the significance of cloud, private cloud and hybrid cloud and threats and challenges arriving from the cyber security side of it, calling attention to the complexity of IT automation which has increased significantly.

“

Digital transformation with multiple technologies and multiple ways of operation resulted IT landscape to change totally.

”

KEYNOTE

Hyper-personalizing digital experiences using AI and real-time data

Mr. Liam talked about the science behind personalization, according to him in order to provide the hyper-personalized experience is about going further than popularity, segmentation, and automatic predictions, it's providing a solution, support, business objectives, and all potential scenarios.

“

When we take on the baton, we are instigating our recommendation service on a product landing page and we are actually helping to increase average clicks per user by 85%, we are increasing conversions by 59%, and the average GMV per user is increasing by 59%.

”

Liam Corcoran

BytePlus

FIRESIDE CHAT

UAE's Fourth Industrial Revolution (4IR) Strategy

**SPEAKER:****SAEED ALHEBSI**

Advisor in AI
Ministry of Human
Resource and
Emiratization

MODERATOR:**MONA SULAIMAN**

Social Media Influencer
& HSE Admin Officer
RAKEZ

The conversation began with a discussion about the UAE's vision of 4th Industrial Revolution strategies and the Initiatives taken to encourage the usage of AI. Mr. Saeed spoke about the opportunities that are provided by the government for the students to do courses on AI and join the government sector of AI in the future.

On being asked about the most important field he's working on in the AI field, he stated "We are taking care of managing the labour market. We are setting the policies, setting the regulation for the employees and the employers, we have more than 7 million labour in the market and more than 800k companies registered overall in UAE."

Elie Tabchouri

Head of Public Sector
Cloud META
Google Cloud

KEYNOTE

From Artificial Intelligence to Human Insight

Elie explained AI and Machine Learning in layman's terms stating a very simple definition of AI - AI is basically mimicking human intelligence and making it available in machines. Later on, he even came up with interesting examples of how machine learning has been evolving every year for the past 50 years.

The key message provided by him was that data is the most important and valuable asset for every organization, but it is the only asset that has zero value on an organization's balance sheet and that's what needs to be changed.

KEYNOTE

Cyber AI is the key

Mr. Jordan gave his take on AI by explaining how cyber-AI is the key to solving the problems we are dealing with for over 20 years. He gave an explanation of how cyber-AI learns 24/7 in our digital environment and how it detects statistical anomalies in the network, users, and devices across the estate.

“

Artificial Intelligence, two wonderful words that have taken the cyber security community by storm including whole industries and humanity itself. It is a fascinating technology that mimics human intelligence and therefore enables the machine to think like us and take important decisions that improve the quality of life across all domains of the industry.

”

Jordan Savvides

Head of IT Security,
National Bank of Fujairah

FIRESIDE CHAT

Why investing in AI is the future

SPEAKERS:

NOOR ALNAHHAS

CEO & Visionary
nybl

SHRIPRAKASH R. PANDEY

Chairman and Managing
Director, CommTel
Networks

DEREK WATSON

Founder
N2 Technology Ltd

MODERATOR:

NATASHA MALIK

Program Manager, Dubai
Future Foundation

The panelists began with a discussion about how tech investment is impacted in 2022, as public tech companies are suffering from some of the biggest losses. The panelists shared their thoughts on how we need to continue to invest in technology in a sustainable way with profit in mind. One of the panellists was quoted saying, *“We need to start looking for future-ready technology, technology for betterment, and technology for sustainability rather than just what is cool in the investment market”*.

Dr Sana Farid

Co-Chair Healthcare Committee, VR AR Association

KEYNOTE

Extended Reality: The Key to Unlocking Industry 4.0

Sana spoke about how we can use emerging technologies to improve human lives and practices across various industries. She shed light on extended reality which basically means a technology that superimposes data before you, it can be in the form of pictures or texts and it can help you to better interact with the information.

“

In my opinion, the 4th industrial revolution is all about managing all the technologies that have been discovered since the 3rd industrial revolution, it is about putting these technologies into impact, and into meaningful translation since it has been established.

”

TECH TALK

Delivering superior customer experience in the digital world through Data Science and AI

Mr. Ruble described how far we have come in terms of progression in CX. He also talked about the hurdles and advancements in AI. He acknowledged the principles of successful AI-driven CX optimizations and talked about his company which can help customers to take their business through the AI transformational journey.

“

We are problem solvers who use data science and AI just as a means to achieve business transformation.

”

Ruble Joseph

VP – Head of Data Science, Analytics and AI Practice, EClx Digital

FIRESIDE CHAT

Unlock the true potential of AI in Healthcare

The panelists shared their knowledge about the relationship between AI + ML and medical data. They emphasised on how AI has turned out to be a transformational technology in the field of health care. They even talked about their experience and the biggest challenges with AI implementation in the medical field and how they overcame it.

SPEAKERS:

DR. MAI EL BARACHI

Associate Dean of Research & Head of Industry Outreach and Executive Learning, University of Wollongong

DR. SANA FARID

Co-Chair Healthcare Committee
VR AR Association

MODERATOR:

SARA RAMADAN

PANEL DISCUSSION

Women In AI

PANELISTS:

LATIFA SALEH ALSHEHHI

Head of Data Management, Road and Transport Authority

AMINA ABDUL RAHIM

Head of IT Engineering office of H.H of Sheikh Mohammed Bin Rashid Al Maktoum

DR. ANASTASSIA LAUTERBACH

Managing Director EMEA, The ExCo Leadership Group

SUMAYA AL HAJERI

Technology & AI Expert

DR SANA FARID

Co-Chair Healthcare Committee, VR AR Association

REEM OSMAN

Chief People Officer, nybl

MODERATOR:

JOUHAYNA AL MHEIRI

Air Traffic Control Officer Sheikh Zayed Air Navigation Center

In the most awaited panel discussion, focused on the state of women in AI today, the panellists discussed why there are only 26% of jobs in AI and Data Science are for women today. They explained how promoting every gender by nurturing the idea of diversity will lead to the diversification of thoughts and ideas.

As per the panelists, when women achieves a leadership position compared to their male counterparts, they have achieved this through a lot more struggle which naturally gives them the sense of putting much more effort into their work. They acknowledged every woman in the event or around the globe by inspiring them to build their careers by following their dreams.

**Axel
Angeli**

Cybernetician – A Digital
Future Evangelist

KEYNOTE

Visual Industries 4.0: Digital Twins, the new trend in AI

Mr. Axel Angeli talked about Digital Twins, replicas of real-world objects in a virtual environment which can help in education, agriculture, and design. Axel also explained how with the help of Digital Twins, we can build virtual prototypes without destroying real resources and preserving the heritage. Digital Twins are cost-effective and the benefits grow exponentially as the complexity of the system and costs of individual components when destructive testing would be mandatory.

“

Digital Twins is the next trend that's coming, we are going to put a visual interface to something that you have known for the last 10 years and is what we call Visual Industries 4.0.

”

While speaking about Digital Transformation Frameworks, he said “I did a survey for my thesis with MIT & Government here in Dubai and we found that half of private & half of the public sector is somewhat similar but, the point that we recommend which is actually based on the result is that you need to take a special shape that integrates all of the frameworks based on your needs.”

Moayad Ratrouf

Digital transformation expert

FIRESIDE CHAT

Responsible AI as a centre of excellence

SPEAKER:

ASHRAF ELNAGAR

Professor of Artificial Intelligence in the Department of Computer Science University of Sharjah

MODERATOR:

DANIELLA ROSSI

Founder & Managing Partner, Unlimited Platform

Mr. Ashraf Elnagar explained ethical artificial intelligence, a governance framework that needs to be provided whenever there's an AI solution. Responsible AI is a protection for customers who are using the system, this framework is meant to be provided by those organizations that are giving solutions in sort of documentation of the procedure. He also shared knowledge about an AI system that sets the priority for the patients arriving in the emergency room based on their condition.

PANEL DISCUSSION

Digital Transformation: Future strategies and Practices

In this panel discussion, panelists spoke about how applying AI to discover emerging trends and identifying changes in consumer preference is easier in AI-implemented organisations. Panelists even shed light upon how data is really important, how to deal with data by understanding it, and building teams to work with these data.

PANELISTS:

WEES ABRAHAM
Managing Partner, Elēkrōn Ventures

AMINA ABDUL RAHIM
Head of IT Engineering office of H.H of Sheikh Mohammed Bin Rashid Al Maktoum

GINO GEORGE
Head of AI, First Abu Dhabi Bank

GIGI MATHEW THOMAS

SPEAKER QUOTES

"At GfK, we are in a unique position globally where we can witness & study trends across time & geography, across the whole global retail landscape. We have worked hand in hand with our customers for decades to understand their businesses."

Daniel Shearly
GfK

"If we think about modern ransomware which moves very quickly, spreads very quickly across the network, that's where Darktrace's AI has stepped in and blocked that from happening and having a bad impact on your organisation."

James Connolly
Darktrace

"We work with different industry segments, like I said we help health care companies, we help logistics companies if you are a retail customer or an e-commerce customer, we are here for you, if you are from insurance, we can help you and let's not forget the internal stakeholders."

Sanjay Patil
Enterprise Bot

"Social media, whatever data it captures across all the social media tools, what happens at the enterprise is 70 times more. So, the scout has the ability to capture that kind of data and then make sense of it through our AI & ML algorithms."

Samson David
Soroco

SPEAKER QUOTES

"5g will enable enterprises to make better data-driven decisions."

Padam Kafle
Aster Adhar

"We have global company coverage for all the data around the world. We collect every available data from every single source online, and we have several agreements with data providers all around the world."

Mirko Lalli
The Data appeal company

"We strongly propagate a mechanism where you have a diverse team, not only across genders but across both different demographics and different functions and that becomes like a foundational stone for you to basically build a trustable AI."

Ajay Agrawal
Happiest Mind

"In terms of platform, we are now presenting a new platform which was founded in March this year which is A-wave and also a data appeal company."

Franco Martino
Almawave

TESTIMONIALS

We generated a lot of potential from the event so I am confident we will see a positive return here hence why we will be sure to keep in touch with Trescon team for upcoming events.

First want to congratulate you on a great event with the AI show. We were really pleased to attend the event and will be looking forward to being part of the next edition next year.

On behalf of Softline Ecommerce team, I'd like to express sincere gratitude for making this amazing event live. It was a good experience for all of us. The event gave us a good chance to extend the business network and to see the market potential.

The tremendous support you provided us with throughout the past period, your exceptional help and support made our participation in such a great event even more special and it helped us achieve our goals from the participation.

The World AI Show was a smashing success. The hall was buzzing with delegates seeking to network, learn and attend all activities. For this reason, I applaud you for your carefully selected guest list.

WORLD AI AWARDS

The inaugural edition of the World AI Awards was hosted in top glory with many AI visionaries and true flag bearers of the MENA region receiving the award for their contribution in the field of artificial intelligence. Below is the list of all the AI Awardee winners:

WINNERS OF WORLD AI AWARDS:
