WAIS SUMMARY

The 36th global edition of World AI Show concluded with 2 days of the power-packed conference that served as a key catalyst for Singapore's bold vision of leveraging innovation and technology to diversify its goals by bringing together government officials & inspirational line-up of Artificial Intelligence experts & solution providers on the 3rd & 4th of August.

The show brought together over 300+delegates & 40+ exception tech leaders asspeakers from across the globe including major stakeholders of Singapore's digital ecosystem. The theme for the conference was premised on helping key government entities and private enterprises that develop a comprehensive Artificial Intelligence roadmap by assessing sectors of critical infrastructure emerging technologies that can be a strategic enabler to boost the nation's economic competitiveness.

DAY - 1

Opening Keynote

Outlining how the government is using AI to enhance government services

Jason shared his views on the role that AI plays in improving delivery of government services and how is implementation of AI making the government operations more efficient and how it is enhancing data across the government departments.

AI represents the front tier of digital government ambition and can be very transmated but I think this is hype about AI, so first key approach is really to focus on value and use cases, be clear what's the problem we are trying to solve.

Jason See
Senior Director, Data Science & Artificial Intelligence Division, (DSAID), GovTech

Tech Talk

How to formulate a winning AI strategy?

Alex discussed about data virtualization and how it is a integrated technique, he shared about the self service model and how it works and how easy it is for the users to discover data and how we should have trust in data and encouraged for reusing the existing data assets and discussed about application of consistent security and governance policies across the enterprise of data landscape.

If you invest in one of the technologies and you build your own platform, you should be resiliant to all the change, change is the constant thing that we actually face every day.

Alex Aung
Director, Sales Engineering (South Asia), Dataiku

PANEL DISCUSSION

The Panelists discussed about data protection and how AI lessons are shifted from data protection to regulatory environment, how in digital transformation AI & RPA strategy have become foundational aspect. They also discussed about how is data strategy helping in harnessing the power of data to support the net zero and how with massive data comes the opportunity to identify patterns and how we can respond faster and better. Discussion further happened on role of data & analytics strategy and how data is being the key for all things AI and what the industry is doing to prepare for the AI revolution. Lastly how these days we are shifting from compliance to accountability in order to build trust with customers.

AI & Data Strategy: Driving innovation in data science maturity to create value in organizations

PANELISTS:

SUTOWO WONG
Director, Data Analytics, Ministry of Health, Singapore

SON TRAN
Chief Information Technology, Officer, Prudential Vietnam

DR. STEVEN HOI
Managing Director, Salesforce Research Asia

PROF. SIMON CHESTERMAN
Senior Director of AI Governance, AI Singapore, Dean, Faculty of Law & Vice Provost (Educational Innovation), National University of Singapore

PRASANNA LOHAR
Chief Innovation Officer, DCB Bank

DR. MERI ROSICH
Chief Data Officer, Standard Chartered Bank

MODERATOR:

ARIVUVEL RAMU
Group Chief Technology Officer, TONIK (Digital Bank)

PANEL DISCUSSION

The Panelists discussed about how artificial intelligence is changing the world of cloud computing, then the importance of Data Governance and MLOps while using ML to drive successful business outcomes and how AI helps in streamlining BI by automating data analytics and delivering insights and how we are using pilot first approach to maximise the scalability of enterprise AI projects.

Accelerate innovation using AI/ML, cloud and data analytics

PANELISTS:

LUIS CARLOS CRUZ HUERTAS
SVP Head of Infrastructure and Automation, Data and Analytics Platform, DBS Bank

RAVI GERALD-VISHWANATH
Global Director: Analytics Kerry

JAMES ANG
Senior Vice President, APAC, Dataiku

NATALIE QUE
Southeast Asia Head of IT, Johnson & Johnson

ALVIN LEONG
Director, Advanced Solutions, Tech Data Advanced Solutions (Singapore) Pte Ltd

MODERATOR:

XIANG HUA LIM
Senior EA Advisor, IASA Asia Pacific

Keynote

Spotlighting NovA!: AI Utility for Sustainable Financing

Danielle discussed about NovA!, which they are building for financial services focusing on generating insights using for artificial intelligence.

"The key challenge is not lack of data but lack of verifiable and trusted data in the spaces."

Danielle Jiang
Deputy Director - AI Development Office, FinTech Innovation Group, Monetary Authority of Singapore, (MAS)

Keynote

AI and Digital Transformation in a changing world

Miao discussed about how AI add value to organization, she shared advantages of AI K- Pop model and how AI contributes to digital transformation and she in depth discussed about digital transformantion.

"There are few areas where AI can make tremendous diference."

Miao Song
Global Chief Information Officer, GLP

Keynote

The Democratization of Analytics: Scale the Impact of Analytics Across the Organization

Adrian discussed about the ways to do things in Democratize analytics, the stages of analytics maturity and how to divide people and technology also about unbalanced spending on data and analytics technologies.

"Analytics process in most organisation are based off legacy system or airplane manual process that really just can't keep up with today's modern economy."

Adrian Tan
Solutions Engineer,
Alteryx

Keynote

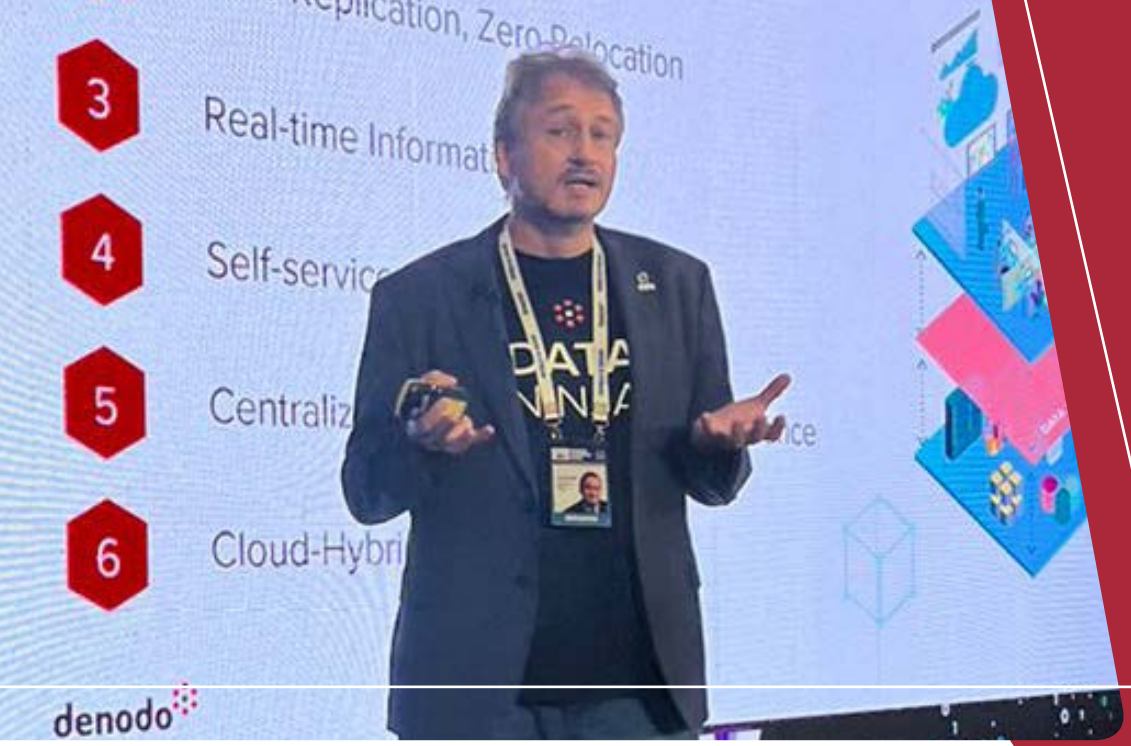

How will quantum computers change AI?

Peter discussed about how Quantam AI is breaking all the Barriers then impact of Quantam era on the business world and he shared tips on how we can get Quantum ready.

"I believe that within the next 5 years we will have the World Quantam Show!."

Dr. Peter Leong
AI Specialist, Singapore, Polytechnic

Tech Talk

Accelerate Business Decisions with NO CODE Intuitive AI Solutions

The speakers spoke about the Lifecycle of the AI project, cafebot platform overview, cafebot high-level component architecture, and Democratize AI with h2o AI cloud solution, they then explained a use case on oil and gas equipment failures/Remaining useful life. Topics also discussed where NLP (Natural Language Processing) enables text analysis and consolidation of extracted data, Reduction in the time and costs associated with document processing and how text mining with RPA improves speed and accuracy.

"You can start small with us and as you grow in your data science journey, we can help you grow and take you to the next level."

Vidhu Gautam
Managing Director,
Easy Data Analytics

Shivam Bansal
Senior Data Scientist,
Kaggle, Grandmaster H2O.ai

Tech Talk

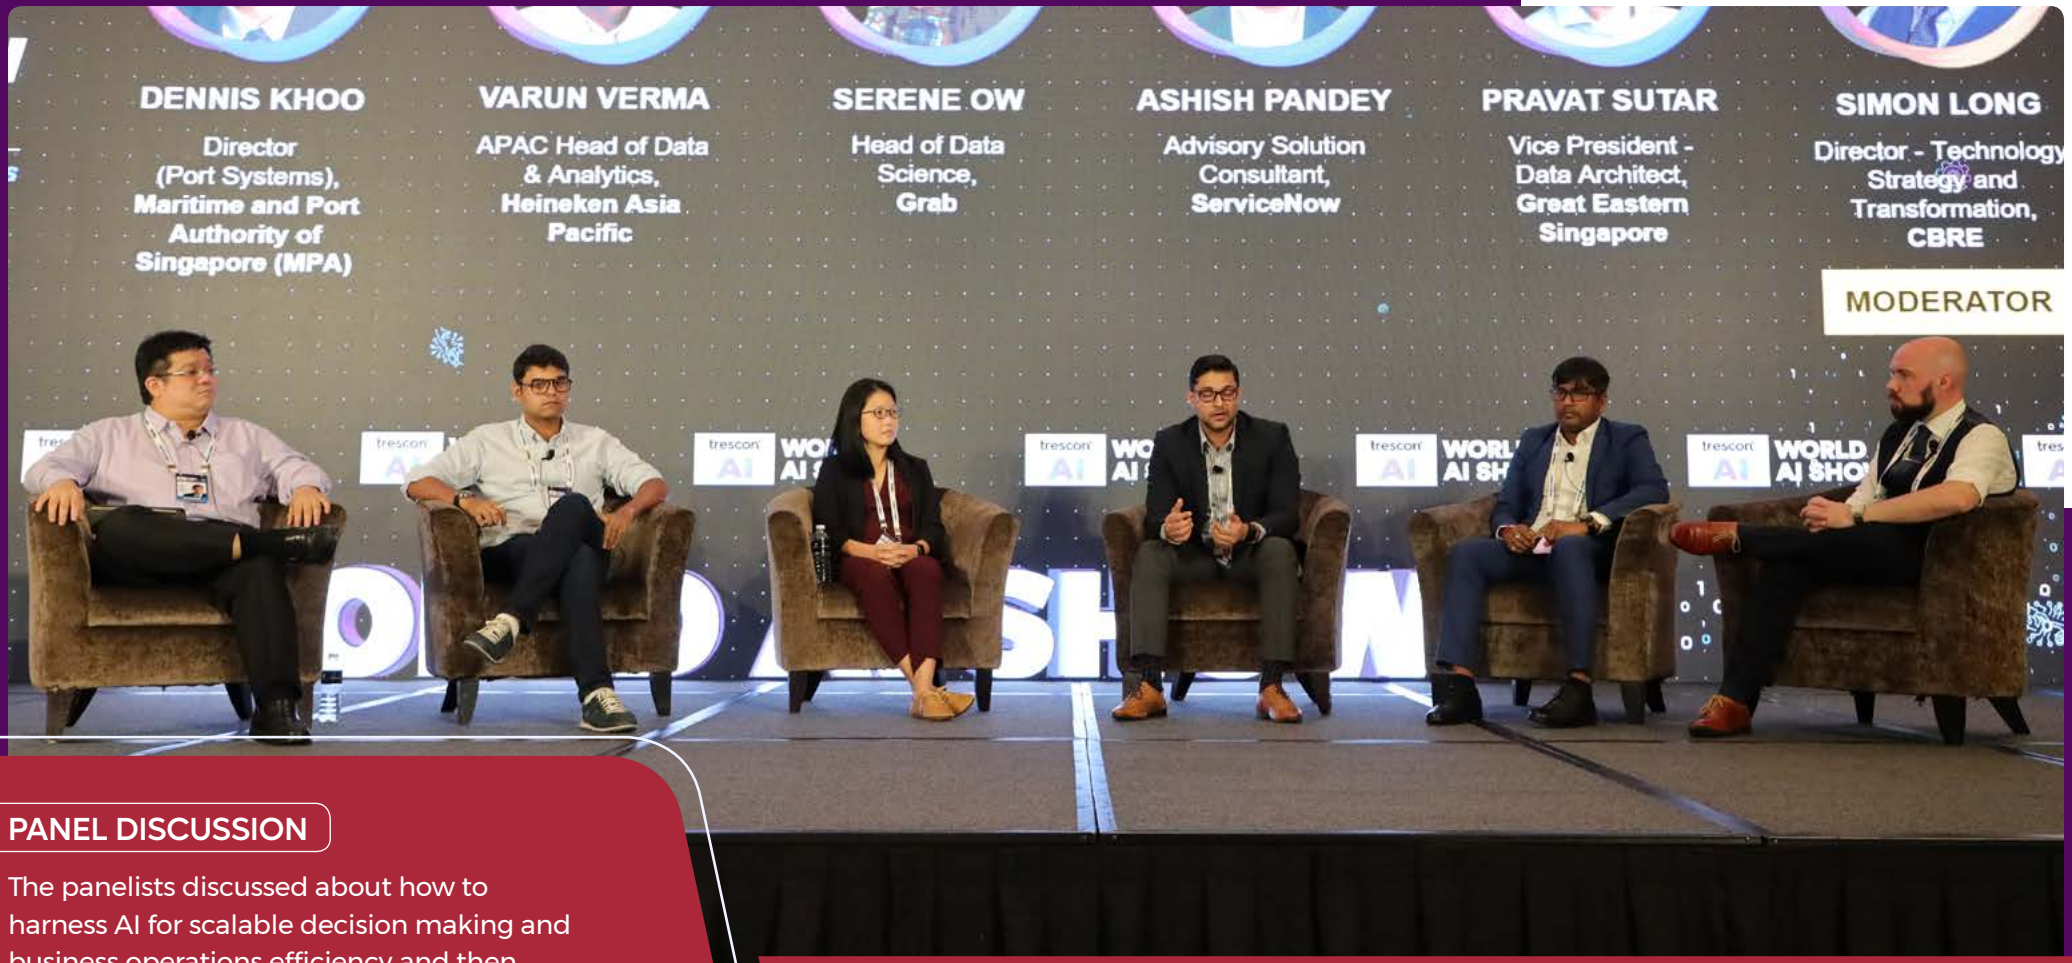

How can you accelerate AI/ML initiatives?

Alex discussed about the benefits we get by taking the logical approach to data science and how many organizations are leveraging data lakes to support machine learning. He talked about structured and unstructured sources and how to store data in original format and the role of data virtualization in AI/ML.

"Data virtualization is the most modern form of integrated data, that is currently available in the market."

Alex Hoehl
Regional VP, ASEAN & Korea, Denodo

PANEL DISCUSSION

The panelists discussed about how to harness AI for scalable decision making and business operations efficiency and then how to use RPA bots to automate rule-based tasks and processes and how digitally empowered business processes through resilience and scalability of critical processes prepare and enable remote work force.

They also discussed about how to align work practices with the strengths of automation and how AI & RPA will transform IT service management.

Driving impact at scale from automation and AI

PANELISTS:

DENNIS KHOO
Director Port Systems Division, Maritime and Port Authority of Singapore (MPA)

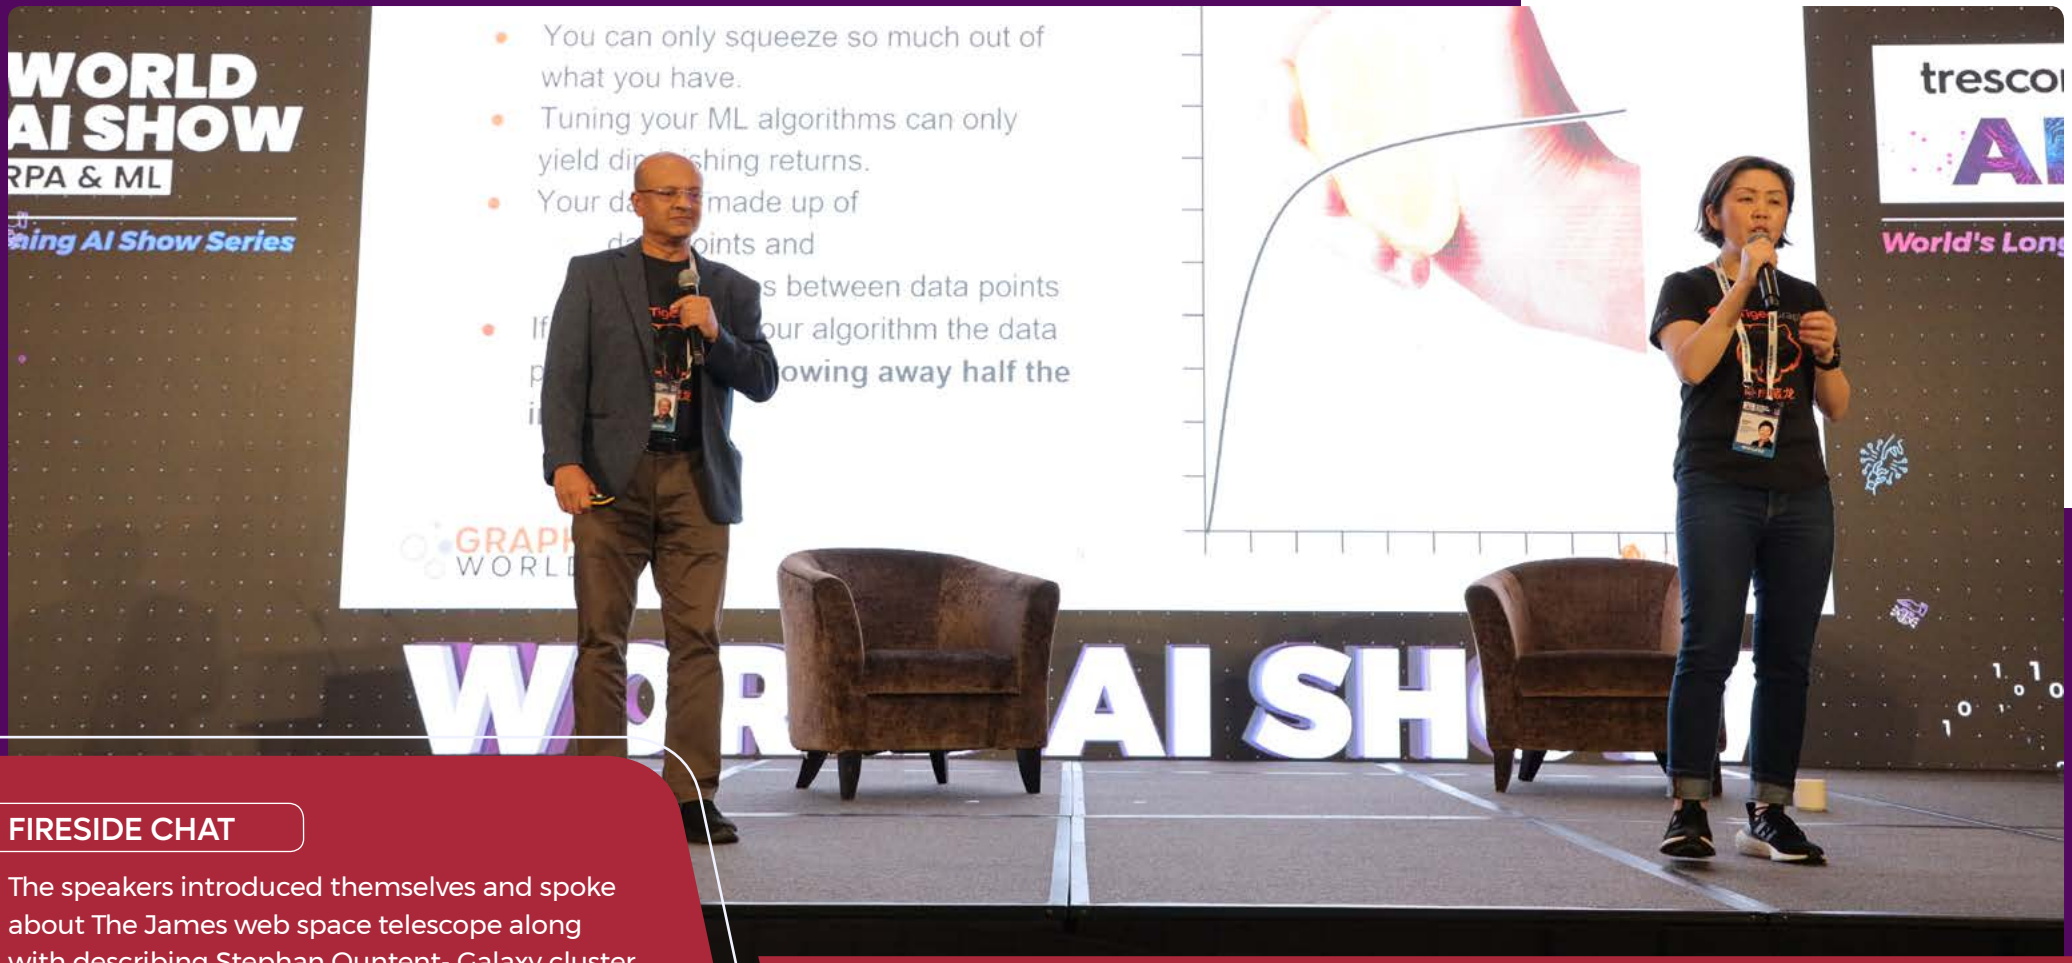

VARUN VERMA
APAC, Head of Data & Analytics, Heineken Asia Pacific

ASHISH PANDEY
Chief Data Scientist & Global Head, Inchcape plc

PRAVAT SUTAR
Vice President - Data Architect, Great Eastern Singapore

MODERATOR:

SIMON LONG
Director - Technology Strategy and Transformation, CBRE

The Complete Hitchhiker's Guide To Graph

FIRESIDE CHAT

The speakers introduced themselves and spoke about The James web space telescope along with describing Stephan Quntent- Galaxy cluster. They spoke about graph algorithms and graph databases and how to detect frauds through graphs. Furthermore, the comparison between galactical databases was spoken about. They explained how Tiger graph creates new ML features and out-of-the-box features for machine learning. Concluded the talk by talking about partners they work with and Tiger Graphs' unmatched technology.

SPEAKER:

AMIT SAWARKAR
Director of Partner Sales,
Tigergraph

MODERATOR:

SERENE KENG
Country Manager,
Singapore,
Channel and
Alliance Head
APAC,
TigerGraph

FIRESIDE CHAT

The panel started by introducing themselves they spoke about challenges faced in Singapore and the downfall in the labor market, and they also discussed the challenging workforce, population on healthcare, and sustainability of care.

They discussed tech hopping in health care and health, factors affecting the healthcare sector, data being a critical player in healthcare and the importance of healthcare in AI along with topics such as powerful tools AI bring to the table, AI-centric healthcare system, challenges and opportunities the session ended by a QnA asked by the audience.

AI – The next frontier for healthcare transformation

PANELISTS:

DR. ADAM CHEE
Chief, Smart Health Leadership Centre, National University of Singapore

DR. SEAN LAM
Head of Data Science SingHealth

MODERATOR:

DR. HAN LEONG GOH
Senior Principal Specialist, Integrated Health Information Systems, (IHIS)

DAY - 2

Keynote

Building the Foundation for Resident Centric Health

He spoke about building the foundation of resident-centric healthcare, the challenges the healthcare sector faces in operating content, digital enablement for healthier SG, and the role of AI. How Singapore has been able to achieve good health outcomes and the life expectancy is been highest in the world, how stakeholder groups will benefit from the use of digital tech, and the overview of the health AI strategy.

"A value is being created when we use technology to solve a business problem."

Sutowo Wong
Director, Data Analytics, Ministry of Health, Singapore

Tech Talk

Lighting up the dark side of the moon

The speaker introduced the dark side of the moon in the enterprise, he then spoke about the world of automation through the eyes of an analyst, he explained how systems work on the light side of the moon and how teams work on the dark side of the moon. He then brought up an example of a DSOTM – sales order management process of a F500 Pharma company. He spoke about Scott tech and how difficult it is. He ended the talk by an example of work his organization did for customers across industries and functions.

"Biggest problem of automation is to know what automate."

Samson David
CEO, Soroco

PANEL DISCUSSION

The panel started by introducing themselves. The discussion began with the topic of AI and ML growth in data and how their organizations are doing in the same domain, challenges in their organizations, and the business strategy they bring on their plate.

They spoke about how they deal with data privacy and data cleaning in their organizations. The speakers also spoke about how they transformed the traditional business into digital-enabled business.

Scaling Data Science, AI /RPA To Boost Business Growth

PANELISTS:

BALAJI UPPILI
Region CIO - ASEAN, South Korea and ANZ, GE Healthcare

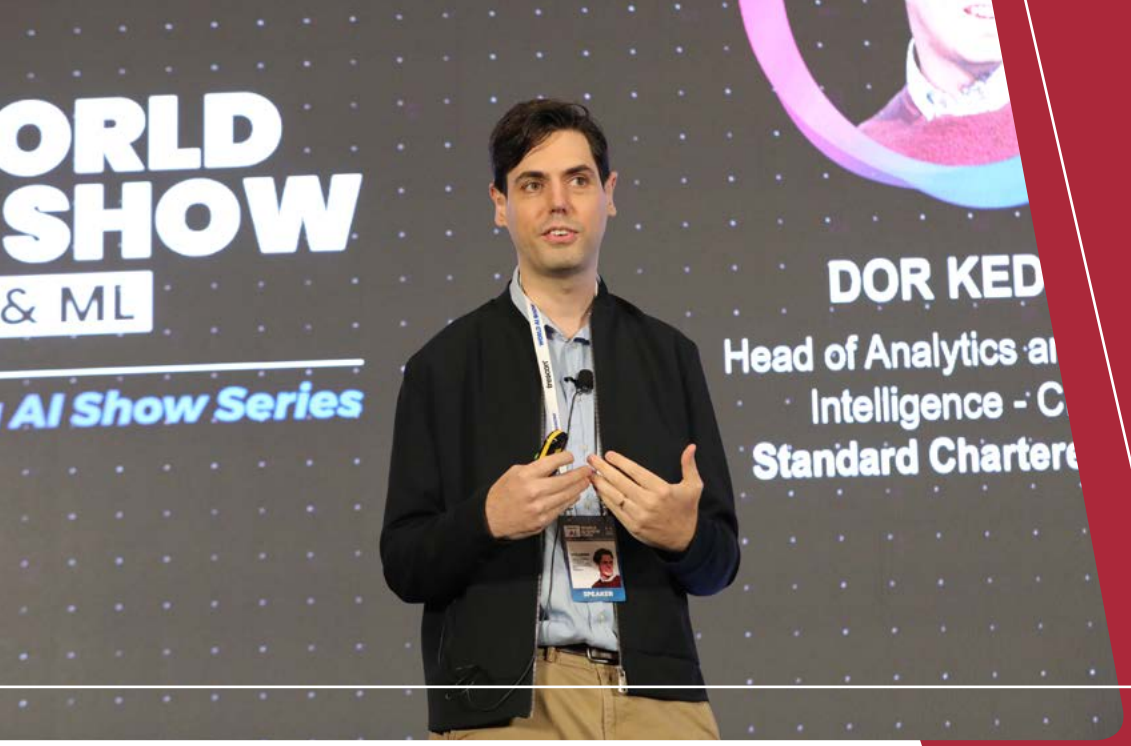

MOHAMED JAWAD ASKAR ALI
Head of Data - Marketplace, Gojek

RAM THILAK
Chief Data Scientist & Global Head, Inchcape plc

TAUHID ABDDUL JALIL
Principal Consultant, Southeast Asia Laiye

MODERATOR:

JIN XIN
Head, Data Science and Analytics, Alexandra Hospital

DAY - 2

Keynote

Building the Foundation for Resident Centric Health

He spoke about building the foundation of resident-centric healthcare, the challenges the healthcare sector faces in operating content, digital enablement for healthier SG, and the role of AI. How Singapore has been able to achieve good health outcomes and the life expectancy is been highest in the world, how stakeholder groups will benefit from the use of digital tech, and the overview of the health AI strategy.

"A value is being created when we use technology to solve a business problem."

Sutowo Wong
Director, Data Analytics, Ministry of Health, Singapore

Keynote

Towards Sustainable AI for Humanity

He spoke about abstract for sustainable AI for humanity, his biography, AI theoretical footprints, AI in 1986-2022, His AI journey 1986-2002, AI programming language, AI 2.0 paradigm shift with the machine and deep learning. He also spoke about AI dilemma and risks, forward with sustainable AI, Trends, metaverse, web3, and AI.

"Sustainability of AI is survival of tech."

Dr. James Ong
Founder and Managing Director, Artificial Intelligence, International Institute (AIII)

PANEL DISCUSSION

The panel discussed How can AI be leveraged to improve customer experience and meet the needs & demands of modern consumers in this modern market? How do technologies like IoT, Chatbots, ML etc. help in shaping the Customer Experience?.

How has Conversational AI evolved and why is it rapidly redefining how customers interact with businesses? Personalized and seamless Omni channel experiences being the core of corporate strategy, Blended AI: improve digital marketing and hassle-free service to the customers.

Unlock the true benefits of AI in the field of Customer experience

PANELISTS:

DIETMAR BÖHMER
Chief Analytics Officer, Tyme

SOURABH CHITRACHAR
Regional VP (Asia) – Technology, Strategy & Ops Liberty Mutual Insurance

ASHISH KULKARNI
Director and Product Owner, Standard Chartered Bank

MODERATOR:

GEETHA GOPAL
Head of Infrastructure Projects Delivery and Digital Transformation, Panasonic, Asia Pacific

PANEL DISCUSSION

The panel discussed How is AI helping organizations to build a better world? Achieving net zero emissions and what can you do with data to achieve that, AI & ML offering tools to open new paths to embrace sustainability, Possible drawbacks of AI in achieving global SDGs.

The Role of Artificial Intelligence in achieving Sustainable Development Goals

PANELISTS:

DR. RICHIE LEE
Senior VP, Group CRES Head of Sustainability, Corporate Real Estate Services United Overseas Bank Limited (UOB)

KHALID NIZAM
APAC IT Regional Leader, Ecolab

SIMON LONG
Director - Technology Strategy and Transformation CBRE

MODERATOR:

DR. JAMES ONG
Founder and Managing Director Artificial Intelligence International Institute (AIII)

PANEL DISCUSSION

The panel discussed How has AI helped to accelerate Singapore's economy's growth. How can investment in Artificial Intelligence help Singapore stay competitive with international competitors What are the primary criteria for investments in AI and other innovative technologies

Exploring the rise of Investments in AI in Singapore

PANELISTS:

ROHIT AGARWAL
Principal Sequoia Southeast Asia

ABDULLAH HIDAYAT MOHAMAD
Co-Founder and Executive, Director Ficus, Group Capital

REMI CHOONG
Principal, elev8.vc

MODERATOR:

STEFANO VIRGILLI
Venture Capital Partner,
DWF Labs

Keynote

Application of Machine Learning in Hospital Inpatient Manpower Forecast

The speaker spoke about alexander hospital, a brief history, motivation, calibrated care intensity, labor demand forecast, and system overview, and ended the talk by talking about challenges and summary.

"We need to address strategic challenges like De-fragment care, Financial sustainability and Manpower sustainability in SG healthcare."

Jin Xin
Head, Data Science and Analytics Alexandra Hospital

Keynote

How IoT and AI are the Perfect Partners to Boost Business Productivity?

The speaker spoke about How AI and IoT have the cumulative ability to restructure the way decisions are made in modern enterprises, Exploring the Implementation Risks of Artificial Intelligence and Machine Learning to protect your business, How will IoT and AI transform modern enterprises? What are the misconceptions that make organizations hesitant to adopt more AI transparency?

"We use natural management to manage risks."

Nirupam Sd
Senior Scientist - IoT & AI,
Energy Research Institute @NTU

TESTIMONIALS

"World AI Show, we find it was quite interesting and very well organized. I must congratulate the organisers, they have done a great job in terms of organizing the show.

Easydata.ai

"We really liked the keynote sessions by many different companies in different parts of AI and RPA, which is very good for others to learn and understand what best practices are there in the market.

H2O.ai

"What we really liked at World AI Show is that we think it's the ability to speak to everyone finally in-person, connect with them and to really understand the pain points that the industry is facing today and specially learning from everyone else who are experts in industry as well.

alteryx

"The event itself was very engaging and lot of prospects and customers were actually interested to learn more about what we do as well as in the overall AI/ML space and I think that was very interesting.

AEROSPIKE

"**I liked World AI Show because I think that it was very fun and we got lots of leads and got to meet up with lots of people in the industry.**
