REPORT OVERVIEW

As Dubai emerges from the pandemic and is poised to become the meeting place of the world, the **19th global edition of World Blockchain Summit** hosted the global crypto and blockchain community – all under one roof.

Under the patronage of **The Private Office of H.H. Sheikh Ahmed Bin Faisal Al Qassimi**, Powered by Werewolf and Headline Sponsor - Uberstate, the summit saw a footfall of over **1500 global crypto and blockchain influencers, investors, startups, policymakers and media**, among others, in three days of informative sessions, pitch competition, powerful networking sessions, desert safari and an afterparty at **Burj Khalifa**.

“I love the energy here. I was able to meet a very diverse set of people across the globe. It’s a great way to bring people from all over the world to the summit.”

NAVIN GUPTA

MD, South Asia and MENA region, Ripple

OPENING ADDRESS

The opening address was delivered by:

H.E. TOMASZ ZALESKI

Chairman, The Private Office of H.H. Sheikh Ahmed Bin Faisal Al Qassimi

MRU PATEL

Founder and Chairman, MyTokenized.Capital | Board Member, Royal Family Office of Sheik Ahmed Bin Al Qassimi

They spoke about how Dubai is evolving and embracing the future techs such as Blockchain, AI and others, and how the Royal Private Office is helping some of the existing organizations and future tech startups coming to Dubai.

OPENING KEYNOTE

The future with blockchain technology

Samson took the audience to look deep into how Bitcoin layer-2 solutions, Lightning and Liquid, work under the hood and their applications today, including the issuance of Stablecoins and security tokens, machine-to-machine payments on IoT, and the creation of censorship-resistant, decentralised chat platforms.

The Lightning Network is a layer-2 protocol built on top of Bitcoin. It uses cutting-edge smart contracts to achieve faster-than-VISA transactions while retaining the peer-to-peer nature of Bitcoin.

SAMSON MOW

CSO, Blockstream

TECH TALK

Digital real estate management: Use cases

Jess explained the applications of digital real estate management and shared his views on unfair and unreasonable heavy regulations, higher ownership costs, and challenges with bank financing. He also helped the audience grasp the potential of real estate and decentralized finance.

“The decentralized digital asset ownership of real estate will change the way that the globe interacts with real estate purchases. With the decentralized nature of this project, anybody can hold their assets directly in their wallets, ensuring greater efficiency, security, traceability and transparency.”

JESS DAVIS

Founder and CEO, Uberstate Inc.

TECH TALK

Capturing long-term value in crypto finance

Annabelle gave an interesting tech talk on capturing long-term value in crypto finance. She delved deep into the future of the digital world and discussed CreatorFi’s development into creator finance, with the main goal of educating NFT creators with engaging crypto finance content, providing creators with end-to-end crypto finance services.

“Since launch, over 100,000 users globally have joined and invested more than USD 1.5bn with Amber Group.”

ANNABELLE HUANG

Partner, Amber Group

FIRESIDE-CHAT

Meeting the crypto regulatory challenges

The fireside chat consisted of speakers from legal service firms that utilize technology to drive efficiencies and reduce overheads.

The core focus of the discussion was to highlight the insights on the various classifications and tax treatments around the world, AML and KYC standards, Stablecoin regulation and DeFi regulation and DEX as an opportunity or threat.

SPEAKER:

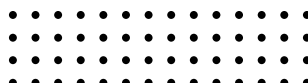

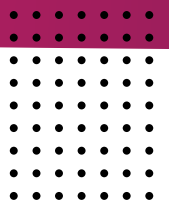

THOMAS NÄGELE

Attorney at Law, Mag. iur., LL.M., Managing Partner, NÄGELE Attorneys at Law LLC

MODERATOR:

CAL EVANS

Founder, Gresham International

TECH TALK

Pioneering financial services for cryptocurrency markets

Jacob gave a brief overview of what GSR does to support the cryptocurrency market through financial services innovation. He discusses how the digital asset industry focuses on providing liquidity, risk management strategies, and structured products to sophisticated global investors.

“Listing and trading in crypto aren’t just about reaching the capital market that you would do in traditional finance. Algorand, Polygon, Firecoin and many other innovative tokens are also used for the transfer of information and governance.”

JAKOB PALMSTIERNA

Global Head of Product and Business Development, GSR

TECH TALK

The future with decentralized monetary systems

Manuel discussed the economic impact of blockchain, crypto assets, and decentralization. He presented statistical data from the crypto market and innovative tokens which are changing the world and solving real-time problems.

“Blockchain is a remarkable disruption that gave birth to the first peer-to-peer electronic cash system that was implemented successfully.”

MANUEL BLANCO

Founder, Gaugecash

PANEL DISCUSSION

The state of blockchain and digital assets

The panel consisted of speakers from the blockchain technology, cryptocurrency and digital transformation sector, gave an overview of the role played by blockchain technology in transforming the public and private sector.

The panellist shared their insights on how governments can support blockchain innovation and adoption, some of the challenges faced during the implementation and adoption while accessing the development of blockchain, the role of crypto as a tool for financial inclusion, scaling blockchain towards mass adoption and the innovations in the decentralized creator economy.

PANELLISTS:

DR MARWAN ALZAROUNI
CEO, Dubai Blockchain Center

TECH TALK

The unique challenges of U.S regulatory compliance and DeFi

Howard talked about the issues with credit mechanism, lending structure, and swift system. He also highlighted the issue of liquidity and how to improve liquidity by employing tactics such as borrowing short and lending long, the unique challenges of U.S. regulatory compliance and DeFi, and the security of DeFi.

“Today, we can use DeFi in a white-listed KYC environment consisting of just non-bank lenders and other institutions, allowing unFederalReserve entities to transact with one another.”

HOWARD KRIEGER

Co-Founder and CEO, unFederalReserve

TECH TALK

Revuto - game-changing subscription solution

Josipa gave an overview of how Revuto disrupted the growing subscription economy by using a FinTech and crypto solution which was powered by the biggest Cardano community, globally.

“Every startup entrepreneur and investor understand that having subscription-based revenue increases the valuation of the company. As a result, both firms that should and those that shouldn’t are adopting this subscription-based business model.”

JOSIPA MAJIĆ

Co-Founder and SVP of Strategy and Communications, Revuto

PANEL DISCUSSION

Blockchain and its impact on business and investing

Speakers on the panel included representatives from crypto venture capital and crypto-financial services firm, with expertise ranging from market making to asset management and structured products. The panel discussion's focus was on blockchain and its impact on business and investing. The panellists also shared their perspectives on the economic argument for blockchain deployments, leveraging blockchain technology to drive new efficiencies in the financial services sector, blockchain's potential to revolutionize the investment sector, and the critical challenges that blockchain must overcome.

TECH TALK

Metaverse: The next internet revolution

Jack discussed the Metaverse, its applications, and why it will be the next internet revolution. He also talked about the potential of Phemex and the play-to-earn concept in the current gaming business, the Decentraland and the rewards that can be gained from it.

“Metaverse is a new way in which we interact with the digital world.”

JACK TAO

CEO, Phemex

TECH TALK

Revolutionizing the way that you travel

Jonathan focused primarily on two coins from two different worlds of crypto space, one of them is travel token, Vacay and the other one is a gaming token called Medabots. He then further explained the use cases of both the coins and their impact on the market.

“Play to earn is one of the most important aspects of the blockchain right now. This will attract a large number of new investors and innovators into the space and educate them on what blockchain is all about.”

JONATHAN DELUCIA

CTO, Vacay Finance and Medabot

MVP LAUNCH

Unleashing the power of DeFi in the real-world: Shaping the future of a US\$ 7 trillion industry with blockchain

Piyush launched the MVP version of his blockchain solution, Polytrade, to assist SMEs in the market, during his session and explained trade finance and how trade finance now accounts for 80 to 90 per cent of global trade.

“Polytrade is harnessing the massive crypto liquidity and trying to bring it to fuel the working capital of SMEs, globally. The sole purpose of Polytrade is to assist SMEs in the trade finance market.”

PIYUSH GUPTA

Founder and CEO, Polytrade Finance

TECH TALK

Assets of tomorrow will be tokenized.

In this tech talk, Remy covered the problems that the investors and innovators are facing on tokenization and why tokenization is a powerful tool for creating and exchanging assets. And he demonstrated it by describing the benefits and applications of the Tozex token.

“Spantale is dedicated to the sports institutes that aim to tokenize athletes’ performance and to provide a way for an athlete to get financial freedom and focus on performance and achievements.”

REMY OZCAN

Managing Director, Crypto4All, President of French Blockchain Federation

TECH TALK

R fund - VC fund investing at a pre ICO stage

She enlightened the audience on why the market is moving toward a subscription-based model and how the startup funding ecosystem has evolved. She also introduced Revuto's R-Fund and programs under it.

"Founders today don't need cash. They want investors to help them to grow their businesses."

JOSIPA MAJIĆ

Co-Founder and SVP of Strategy and Communications, Revuto

TECH TALK

Blockchain based healthcare

The session started with the inauguration of HTraxcoin, a next-gen digital coin for the healthcare domain and then Anuj enlightened the audience on how MAH is bringing information technology-based innovation in the healthcare domain.

"When it comes to the healthcare industry, innovations in terms of digitalization or IT, I think we still have a lot of space in the healthcare industry."

ANUJ KUMAR GARG

MAH Healthcare

OPENING ADDRESS

Bringing real-world data to smart contracts

Nick Spanos, delivered an informative talk on the future of smart contracts, bi-directional data messaging between on-chain contracts and off-chain data, trusted execution environments, maintaining confidentiality, the monetary revolution, a tamperproof system and building critical infrastructure to power the next wave of decentralized applications.

“The third-dimensional world will change because it will be able to stimulate on its own, utilizing various data sources, financial events, and blockchain, which is extremely important. The future of blockchain technology is rapidly approaching.”

NICK SPANOS

Bitcoin Pioneer

OPENING ADDRESS

IOTA: Its basic principles and approach to consensus

Serguei introduced the key concepts of IOTA as well as its basic principles and approach to consensus. He discusses the importance of machine economy and how it was the original motivation for creating IOTA with an underlying infrastructure that supports a unique set of features.

“The basic principle of IOTA is to work on the basis of ‘You help me, I help you’ principle.”

SERGUEI POPOV

Co-Founder, IOTA Systems

OPENING KEYNOTE

The future of payments

Navin gave an overview of the current payment business structure and compared it with the future payment system that comes with the ongoing tech disruption. He stated that fundamentally, payment has the main role to play to complete any transaction. It doesn't matter if it's a metaverse or a physical world.

“Companies will be able to accomplish greater output and growth by increasing the velocity of money, and blockchain will assist businesses in executing that.”

NAVIN GUPTA

Managing Director for South Asia and MENA region, Ripple

TECH TALK

Crypto and the future of business aviation

Mauro and Vittoria shared their thoughts on the current state of travel and the aviation industry, as well as the potential future of the aviation industry to blockchain technology, during the tech talk.

“The first time I looked into cryptocurrencies, I was only looking to make an investment. Only after a year or so did I realize that blockchain is the real deal and that creating a unique product here for the aviation industry is a business priority.”

MAURO DE ROSA

Founder & CEO, Fast Private Jet

VITTORIA DINI

Global Client Manager, Fast Private Jet

PANEL DISCUSSION

Blockchain x NFTs x ART x Gaming: Innovation, Transformation & Tokenization

The session featured top experts from the NFT, Gaming, and DeFi industries.

The panel focused on topics such as how NFTs help regular users prove ownership and authenticity in the commerce space, KYC, the concept of the play to earn model, blockchain gaming, how NFTs are the backbone of the metaverse, industries that metaverses will dominate, and the future of the metaverse and NFTs.

PANELLISTS:

CYRUS TAGHEHCHIAN
CEO, Splyt Core Foundation

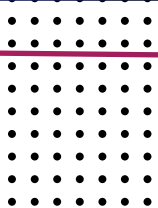

KATE VASS
Founder, Kate Vass Galerie

KEVIN SOLTANI
CEO, Semper Fortis Esports PLC

FELIX MAGO
Co-Founder of Space & Dash Next

MODERATOR:

Co-Founder and COO
GIMA Group, Inc.

TECH TALK

Blockchain based advertising

Krzysztof began his presentation by describing the vision and mission of his company, Adshares, that use blockchain technology to reduce the cost of online marketing. The tech talk was then continued by Jacek, who used intriguing methods and research to demonstrate how Adshares technology works in conjunction with blockchain technology. He also explained the Adshares protocol and the structure that advertisers can follow to reduce ad costs and get a good return on ad spend.

KRZYSZTOF BOCHENEK

CEO, Adshares

JACEK ZEMO

CTO and Co-founder, Adshares

TECH TALK

Unlocking the possibilities of crypto for banking and financial services

Albert discussed the potential of smart contracts that are linked with real-world income. Albert's presentation was about exploring uncharted territory in crypto, eCommerce and banking services space and reaching the unreachable.

"Mondo Gate is creating a community-driven, deflationary token supply, which connects the scalable eCommerce and banking solutions."

ALBERT HILD

Management Board Member, Mondo Gate AG

TECH TALK

Bringing real-world data to smart contracts

Omar Rahim provided an overview of what Binance is attempting to do in the crypto and blockchain space. He insisted on focusing on what we needed to do to build an ecosystem, a problem that many companies are attempting to solve.

“There will be winners and losers in the race to adopt blockchain technology. Countries that rely on traditional space will miss out on many opportunities, while countries with a strong presence in new technologies will be able to wield far more power as a result of the rapid adoption of blockchain technology.”

OMAR RAHIM

MENA Director, Binance, UK

TECH TALK

Understanding the conscious value of layer technology 2 on blockchain 3.0

James began his keynote by dispelling myths about blockchain 3.0 and then went on to discuss why blockchain technology is a perfect solution for the internet's current issues.

“The shift from existing web 2.0 to blockchain web 3.0 is a long-term process that will fundamentally change the way we interact with the internet.”

JAMES SUNG

Co-Founder, CVN

KEYNOTE

Accelerating the adoption of digital currencies

Nick discussed how we can help accelerate the adoption of digital currencies and the various barriers to the widespread adoption of cryptocurrencies. He highlighted the new model of digital currency adoption, including who is likely to adopt, who will be key actors, and what forces will drive adoption.

"In parallel, regulatory bodies worldwide are increasingly looking to control, utilize, and tax crypto."

NICK SAPONARO

CEO and Co-Founder, The Divi Project

TECH TALK

Hybrid exchange concept: ByteDex Ecosystem and Byte Exchange

The rise of NFT marketplaces has been revolutionary for both artists and collectors who use the platforms. However, Ismail points out that one of the problems with NFTs is that artists who want to sell their work are often hesitant to list it due to the difficulty in recouping costs.

"The only way to protect your crypto investments is to keep token ownership within your own hands."

ISMAIL KOSEOGLU

CEO, Bytedex

PANEL DISCUSSION

When open finance meet DeFi

The panel consisted of speakers from businesses with regulated entities and financial institutions, brought to the table some interesting insights from various perspectives on the stumbling blocks that may prevent mainstream adoption, the future role of traditional fiat currency, the challenges surrounding DeFi regulation, whether the decentralized system can even be regulated, and what is the next stage of DeFi evolution.

The discussion then shifted to the major elements of the session to give insights on what happens when open finance meets Defi.

KEYNOTE

Bridging the gap between Blockchain and Traditional World

Eneko gave an interesting tech talk session on how blockchain is the underlying technology behind the world's leading digital currency, Bitcoin. He described blockchain technology as a distributed, digital ledger of transactions with a transparent and secure record-keeping process. He claims that while blockchain is frequently referred to as the next generation of the internet, it can also be used in traditional financial services, supply chains, and real estate.

"We believe governments will crack down on DeFi projects that do not require KYC."

ENEKO KNORR

CMO, Woonkly Labs

TECH TALK

Fundraising and Marketing

The tech talk by Vinor and Andrey enlightened the audience on topics such as fundraising, marketing, market making and liquidity management in the crypto service business.

"We aim to make the fundraising process faster, smoother and more accessible to every business, large or small."

ZUKHUBAYA VINOR

Head of Marketing, Coin Liquidity Solutions

BARAL ANDREY

Senior Business Development Manager, Coin Liquidity Solutions

TECH TALK

Solving the challenges of trading, farming, staking and holding

During the tech talk, Zaidoun focused on the problems faced by individuals who want to trade, farm, stake, and hold on their own. He also explained how individuals use Sphynx Token to buy and sell commodities in the marketplace.

“There is a massive gap in bringing everyday people into crypto.”

ZAIDOUN AL-OWBYDI
CEO, SPHYNX SWAP

TECH TALK

The future of learning

Igor explained the challenges in the online physical training market and how Studyum is solving them. Studyum is a peer-to-peer, open-source learning platform that seeks to provide the most education to the most people while preserving the privacy of the user. It provides users with a comprehensive, robust, and secure environment to create, share, and modify learning materials.

“Millennials and Gen Z are carving the next big thing in 3D content.”

IGOR DYACHENKO
CEO and Co-Founder, Studyum

PANEL DISCUSSION

Road to mass adoption: What's in store for 2022?

The panel consisted of speakers from diverse fields such as crypto ventures, investments and marketing. They focused enlightening the audience on what will be the roadmap for mass adoption of crypto and blockchain and their outlook to 2022.

The discussion shed light on topics such as key challenges in the institutionalization of crypto, trading strategies for retail investors and also, what is next after crypto, DeFi and NFT. They also shared their views on what will take crypto from a market cap of US\$ 2 trillion to 20 trillion.

TECH TALK

Connecting mainstream gaming with Blockchain and NFTs

Jordan started the session by introducing Revomon, features and how it is disrupting the gaming industry with the help of blockchain, NFT and VR. He also shed light on the VR and gaming industry statistics and how the industry is evolving.

“Revomon’s smart contracts also allow gamers to trade in-game assets without leaving the game, whether in real life or the virtual world”.

JORDAN IETRI

Co-Founder and CEO Revomon

TECH TALK

Leveraging the power of decentralized finance to build and invest in leading blockchain projects

He shared his experience in the Cardano and Polygon ecosystems, how to grow and launch a token-based startup, and how Vent Finance is helping in ideating, launching and building startups with the help of research-based insights.

“Business models are evolving in their relationships with customers.”

LUCAS MATEU

Co-Founder & COO Vent Finance

STARTUP WORLD CUP – REGIONALS – WINNER

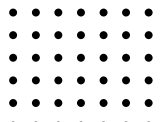

World Blockchain Summit also provided 20 startups a platform to exhibit their innovative capabilities in front of global investors at the Startup World Cup regionals. Autonomy Network, an off-the-shelf generalized automation solution powering the Web3 with on-chain conditional execution, won the pitch slot at the 2022 Startup World Cup in San Francisco. They will now get an opportunity to network with startups and investors at the Grand Finale of the Startup World Cup and pitch Autonomy Network for a US\$ 1 Million investment prize.

TRESCON TWITTER CONTEST

World Blockchain Summit - Dubai has also organized an exciting Twitter Contest for the attendees. Amaury Leveaux, the CEO of Spantale, won the contest and received Bitcoins worth US\$ 1000 as the prize.

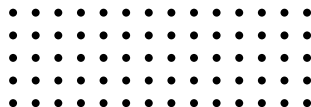

WORLD BLOCKCHAIN SUMMIT AWARDS

The summit has also acknowledged and awarded the major players and thought leaders for their immense contribution to the crypto and blockchain ecosystem as a whole.

Polytrade to Unveil its Minimum Viable Product at the WBS in Dubai

October 7, 2021 - 2 min read

ROAD TOWN, BRITISH VIRGIN ISLANDS / ACCESSWIRE / October 7, 2021 / Polytrade, a blockchain-based protocol that brings safe and insurance-backed real-world assets to the crypto world is set to launch its Minimum Viable Product (MVP) at the [World Blockchain Summit 2021](#), happening in Dubai in October. As announced by the company, the MVP launch will be unveiled by its Chief Executive Officer, Piyush Gupta, who will also be delivering a keynote speech at the Summit.

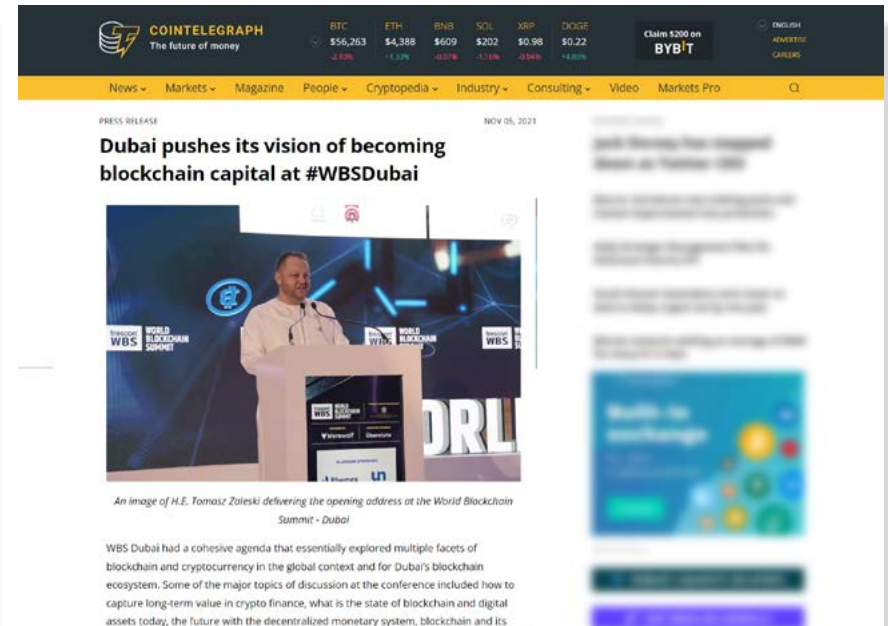

The Essence of MVP to Polytrade's Growth Push

Minimum Viable Products are often launched before a project releases the fully compliant version of its protocol. As the name implies, MVPs are used to check the viability of the core functionalities that a project embodies when it is fully opened to the public.

The evolution of blockchain technology is currently being showcased by the emergence of several innovative projects with solutions to the real-world problems of today. With all projects maintaining a steady development course, the point at which the underlying technology is opened to the public can aid in the acceleration of the growth through the adoption of Polytrade. Based on the importance of this public access, blockchain innovators attempt to give their platforms a headstart through the launch of an MVP.

The plans by Polytrade to unveil its MVP are strategic as it is set to be pushed to a global audience where notable industry veterans will be in attendance. These veterans include Alex Mashinsky of Celsius, Dr. Marwan Al Zarsouni CEO Dubai Blockchain Centre, and Serguei Popov, the Founder of IOTA Foundation amongst others.

With notable milestones attained thus far, the MVP will help usher in the next phase of development which will see the

The Great Potential of Metaverse

Place/Date: - November 2nd, 2021 at 6:41 pm UTC - 4 min read
Source: Metaverse

Phemex took part in the World Blockchain Summit in Dubai, UAE, on October 13-14. This event was attended by more than 1,500 experts from the world of blockchain, which made it especially memorable.

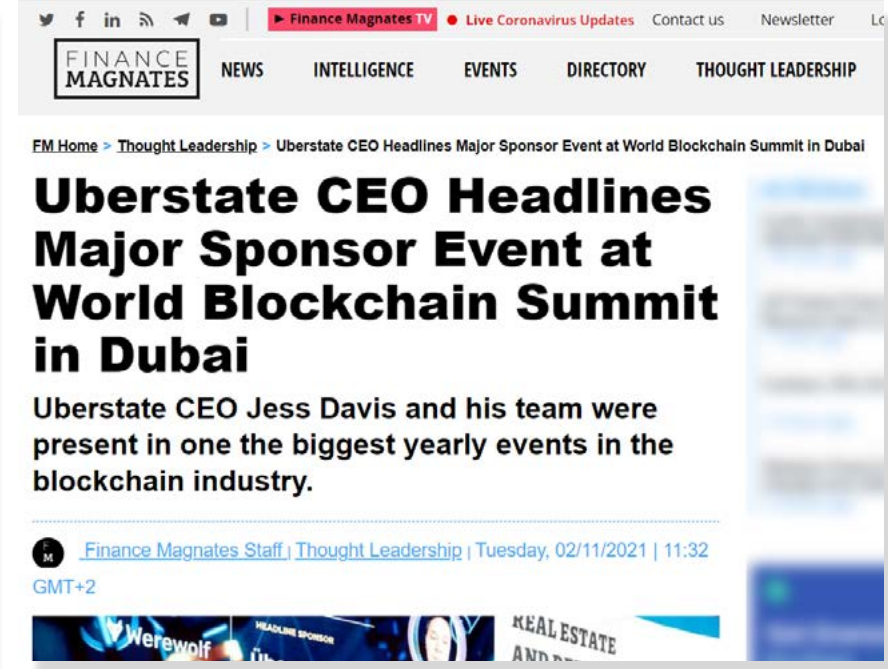

At this event, participants were able to:

- Establish cooperation with the largest crypto and blockchain companies;
- Meet like-minded people, opinion leaders and leading investors;
- Improve their skills and learn about innovations.

At the meeting, Phemex CEO Jack Tao gave a presentation. He said that the current banking system is unequal and more friendly to richer players.

Having over a decade of wall street experience, he believed that users needed a more secure and stable platform for **crypto trading**. So in 2019, he and his Morgan Stanley colleagues launched their own platform - Phemex. At the moment, the company is in
