SUMMARY

As Dubai emerges from the pandemic and is poised to become the meeting place of the world, the **22nd global edition of World Blockchain Summit** hosted the global crypto and blockchain community – all under one roof.

Under the patronage of **HH Sheikh Juma Ahmed Juma Al Maktoum**, Member of the Ruling Family of Dubai; Presented by Chingari and $GARI; Co-hosted by Paysenger; and Powered by Bybit, is taking place on 23 - 24 March 2021 at Atlantis, The Palm, Dubai.

The summit saw a footfall of over 4000 global crypto and blockchain influencers, investors, start-ups, policymakers and media, among others, in three days of informative sessions, pitch competition, powerful networking sessions, investor gala dinner and afterparty.

OPENING ADDRESS

Furqan explained the growing importance of Blockchain in the current global economy. He also explained how blockchain has given rise to a new platform for businesses and social relationships that combine ease of use, low cost and high security. It has created a new foundation of trust for businesses and personal transactions that can and will contribute to considerable simplification and acceleration of the global economy.

"UAE's effort to develop its blockchain ecosystem and ultimately become a global blockchain hub has been characterized in terms of initiatives and policies that sustain the momentum of this rapidly growing blockchain industry."

The opening address was delivered by:

FURQAN RASSUL/ ON BEHALF
OF HH SHEIKH JUMA AHMED JUMA AL MAKTOUM
CEO, Elite Partner Investment LLC

OPENING KEYNOTE

How much is your EGO worth?

Stan took the audience to look deep into how communication content can be transformed into NFT. He also shed light on how valuable attention is just like blockchain. It is important to prioritize.

What we should think about is, our collective intelligence, how we people interact with each other and how we share our personal knowledge. We should also think about we can change the world ."

STANISLAV NOVIKOV
CEO, Paysenger

TECH TALK

Getting a billion DAUs to crypto

Sumit Ghosh He took the audience through the journey of Chingari and Gari app. He explained how social media and gaming will take over the daily active users in crypto. The future how internet should be built is through web 3.0 or though the blockchain where the users can be the owners of what they make. He explained how Chingari allows the creators to be more creative through short videos and make money out of it.

"The next 1 billion daily active users in crypto will come from gaming and crypto. Chingari will create the next creator economy revolution."

SUMIT GHOSH
CEO & Co-Founder, Chingari App

KEYNOTE

An update from the Cardano Foundation

Frederik explained the importance of decentralization and scalability of the blockchain technology. He also focused on how he is building financial and social operating systems which allows customers to represent value, identity and governance all in one place. He focused on how TRUST is the only legal performance enhancing drug.

"We are now finally opened blockchain for business. We are at a stage where we can use this magnificent technology not just for NFT's or digital assets, but we can use this offline as well."

FREDERIK GREGAARD
CEO, Cardano Foundation

PANEL DISCUSSION

The panel consisted of speakers from the blockchain technology, cryptocurrency and digital transformation sector, and gave an overview of the role played by blockchain technology in transforming the public and private sector. The panelist shared their insights on the latest developments in Blockchain, Digital Assets and CBDCs over the past 12 months and delving into some of the specific challenges to implementation and adoption. They also discussed how governments can support blockchain innovation and adoption, some of the challenges faced during the implementation and adoption while accessing the development of blockchain.

Fostering the Global Crypto Ecosystem

PANELLISTS:

- **NICOLE SANDLER** — Head of Digital Policy, Barclays
- **DR MARWAN ALZAROUNI** — CEO, Dubai Blockchain Center
- **DIMITRIOS KAVVATHAS** — Chief Strategy Officer, Amber Group
- **RALF GLABISCHNIG** — Founder, Crypto Oasis
- **SUMIT GUPTA** — CEO & Co-Founder, CoinDCX

MODERATOR:

- **CAL EVANS** — Gresham International

FIRESIDE CHAT

The fireside chat consisted of speakers from legal service firms that utilize technology to drive efficiencies and reduce overheads.

The core focus of the discussion was to highlight the insights on how Blockchain is improving the end-to-end payment journey for customers and the ever-changing tokenization and innovation investment as we know it.

What will be the tipping point for crypto going mainstream?

PANELLIST:

IGNEUS TERRENUS
Head of Communications, Bybit

MODERATOR:

MRU PATEL
Chairman & Co-founder
MyTokenized Capital

KEYNOTE

Benjamin gave an interesting tech talk on web 3 infrastructure and future of commerce in data. He delved deep into shift in attention economy to stakeholder economy and how this will turn customers and employees of businesses into owners.

"The X factor of crypto adoption is integrating automated payments and incentives into conventional businesses & entrepreneurial activities."

BENJAMIN JORGENSEN
CEO, Constellation Network

KEYNOTE

Sanjeev spoke our personalized health based on genomic and metabolic data. Based on that data it is possible to create highly personalized lifestyle modifications plans for people. He also explained how to know about diseases in advance and modify the lifestyle to prevent or postpone diseases in future. He also spoke about bio hacking and how users can get to know their biology with the help of geno metabolic analysis to make changes in the lifestyle.

"Quantified health tools is going to be the next big thing in healthcare economy. We are building an ecosystem in which the users can take the full charge of their health."

SAJEEV NAIR
Founder, Limoverse

KEYNOTE

Fasttoken Blockchain Solutions

Pavel gave a brief on Fasttoken's NFT marketplace, a platform where users can find and avail themselves of the usage of unique solutions provided by Fasttoken's ecosystem that give utmost importance to the authenticity of minted assets and their smart tracking process.

"The FastEx wallet will be used as a unified solutions for all other brands under Fasttoken umbrella, including the NFT marketplace, FastEX payment solutions, and multiple decentralized applications."

PAVEL ARAMYAN
Product Manager, Fasttoken

KEYNOTE

Custom blockchain for AI

Dr Ben gave a brief overview on AI and blockchain which are proving to be quite a powerful combination, improving virtually every industry in which they're implemented. He also explained how AI can effectively mine through a huge dataset and create newer scenarios and discover patterns based on data behavior.

"The confluence of AI in blockchain creates perhaps what is the world's most reliable technology-enabled decision-making system that is virtually tamper-proof and provides solid insights and decisions."

DR BEN GOERTZEL
CEO, SingularityNET

TOUFI SALIBA
CEO, Toda Network

TECH TALK

Investment Strategies in the Web 3.0 Era: how Smart Currencies are Transforming Access to Wealth

Global Rossie gave an overview on how web 3.0 and cryptocurrencies transform the economy and the crypto realm in a few years from now could transform into a more impactful space. She explained, with the economy moving forward this is the best time for people to diversify their investments.

"Web 3.0 is the next internet revolution where the focus will be on intelligent information accessibility."

HON. ROSIE RIOS
Senior Advisor, Unicoin, Former Treasurer of the United States

KEYNOTE

What will happen to GPU miners after ethereum 2.0?

Vladamir gave an overview on Ethereum mining and its alternatives. Ethereum has been on the long path of transitioning from a Proof of Work consensus protocol to Proof of Stake for over a year now. Vladamir explained about the mining DAO instrument and the future of mining.

"If there is no profitable alternative to Ethereum once all of the Ethereum miners begin to switch, GPU mining will likely die off."

VLADIMIR PROTASEVICH
Ceo & Founder, Ezil

FIRE SIDE CHAT

Web3 - Investing in the internet's next frontier

"Though it is difficult to understand and seemingly easy to dismiss, the advent of a decentralised internet demands our attention as it is a fundamental shift away from how we use the web today."

Web3 is the next generation of the internet says Noor, a veteran venture capitalist in Dubai who has been tracking the rise of the technology and eyeing opportunities.

Jehan gave an overview on forms of web3, including decentralized social networks, "play to earn" video games that reward players with crypto tokens, and NFT platforms that allow people to buy and sell fragments of digital culture.

PANELLIST:

NOOR SWEID
Founder and General Partner, Global Ventures

MODERATOR:

JEHAN CHU
Co-Founder and Managing Partner, Kenetic

PANEL DISCUSSION

The panel consisted of speakers from diverse fields such as crypto ventures, investments and marketing. They focused enlightening the audience on investing in Web 3.0 and the Crypto ecosystem. The discussion shed light on topics such as key challenges in the institutionalization of crypto, trading strategies for retail investors and also, what is next after crypto, DeFi and NFT. They also shared their views on what will take crypto from a market cap of US$ 2 trillion to 20 trillion.

Digital Assests: The investors perspective; The Futre of Consumer Finance and Investing in the Crypto Age.

Behold The NFT ocean:

Pablo gave an overview on NFT market. He also explained importance of examining different wallets available to store NFTs before committing resources. NFTs have emerged as a new and innovative way for organizations, brands, artists, and celebrities to engage with their customers and fans. He also explained how NFT's can enhance fan and community engagement.

"The global NFT market has emerged as a significant and growing subsegment of the digital assets market in recent months, with a gross transaction value of $370 billion."

PABLO VALLES
Venture and Strategy Architect, ConsenSys

KEYNOTE

Web3 Investor for Mass Adoption

Joanna began the keynote by discussing about Web3 and how it is attracting a flood of investor interest but is rife with hype and speculation. According to her value investing approach can help. Adoption of "intangible value" lens to crypto and build a value strategy in small-cap tokens and create Web3 industry classifications and crypto stock portfolios.

"Traditional giant companies are entering into the world of metaverse. There will be a huge difference between web 2 and webs 3 metaverse."

JOANNA LIANG
Co-Founder and CEO, Digital, Finance Group

KEYNOTE

DIG Justin went over why every year there is a new crypto trend formed. He also discussed how gaming can be the next crypto trend in the year 2022-23. There is a exponential rise in the active game users since 2017. Metaverse and NFT's have given the access to infinity.

"The gamers today are not only interested in games but also in economic incentives. There are communities connected to it. It is important to understand the new gamers."

JUSTIN PIKELIS
President of DIG, Decentralized

KEYNOTE

Is Staking is the Quiet Giant of Crypto Yield?

The speakers discussed how crypto staking has been around for a while now but it was not initially known to many crypto users. Then it was a silent crypto verification and earning system, now it is the next big thing in the cryptocurrency market. They also explained why is Crypto staking so popular.

"Crypto staking is a very significant aspect of the blockchain, providing a market cap of $633 billion for all the staking platforms."

ALEX FALKO
Co-Founder and CFO, Citadel.one

ARINNA SHTEDLE
Chief Business Development & Integrations Officer at Citadel.one

KEYNOTE

Terra - The Future of Quality Blockchains, LUNI - Complete Blockchain Experience on Terra

In his talk, Dawid provided several architecture design tips for working with Blockchain. Melisa mentioned that the key design principles that any Blockchain application should be designed around are data integrity, data transparency, scalability, reliability and availability. The trick is to start checking for all these attributes early in the design phase and have regular checks to ensure you are meeting them throughout the entire design process.

"Using blockchain we can shift to smaller systems that store everything in a contract."

DAWID SMYK
CTO/COO of LUNI Project, LUNI | Built on Terra

MELISA KURTCAN
Business Development Representative of LUNI Project, LUNI | Built on Terra

KEYNOTE

The Power of Digital Ecosystems

Richelle sugests there is a path for more established players to use ecosystems to level the playing field. This path has been opened up, in part, by the ubiquity of digitization and data and the emergence of advanced analytics, tools that give companies better insight into customers and market niches, allowing them to personalize products as never before.

"Most of the companies with the world's highest market capitalizations are tech companies that generate much of their revenue from the digital ecosystems they created."

RICHELLE NICOLS
Founder & CEO, Nicco Global Pty Limited

KEYNOTE

Mass Crypto Adoption: how to use crypto on your messenger and prove ownership with NFTs

Alex is bullish on the possibilities of crypto method of payment, which he believes will eventually overtake credit card transactions in a few years, due to credit's high amount of fraud.

"Crypto is yet another example of a new technology that is more efficient and replaces and consolidates the intermediaries. A good comparison is how ridesharing technology with Uber and Lyft overtook the usage of regular taxis, drove costs down and increased inefficiencies."

ALEX BORUTSKIY
Co-Founder, iMe Lab

> ***UAE's effort to develop its blockchain ecosystem and ultimately become a global blockchain hub has been characterized in terms of initiatives and policies that sustain the momentum of this rapidly growing blockchain industry. "***

FURQAN RASSUL
CEO, Elite Partner Investment LLC

FIRESIDE CHAT

Dinis gave an overview on how metaverse is a rapidly emerging virtual reality that may have a life-altering impact on us sooner than later.

Due to the potential for interoperability between different providers, user-generated content will play a huge role in the metaverse.

Metaverse, AI, Blockchain and the future of business, tourism and world economy

"With the metaverse having an independent, whole economy of its own, cryptocurrency and digital currency will likely become the key transactional method."

PANELLIST:

NFTs and the Entertainment Industry

NFTs started out as standalone pieces of art and memes by individual creators and today is a massive industry that's swarming with innovative NFT projects today. NFTs present a tremendous opportunity for mixed-reality world-building experiences, deepening user engagement and interaction and fostering a community for our hundreds of millions of global consumers to create one-of-a-kind digital collections and Autograph is the optimal destination for this discovery, claims Zachary.

NFTs in entertainment have the potential to completely transform the way films are made, produced, and distributed, democratizing this unilateral industry in the process."

ZACHARY KEATS
Director of Corporate Development, Fellaz

TECH TALK

Crypto's Confidence Chasm: The biggest challenges to true mass adoption

Chris gave an overview on where are we exactly in the adoption cycle of cryptocurrencies? Are there any analogies from the past that can give investors an indication as to which trends to capitalize on right now? Lastly, how can we be so sure that the mass adoption of cryptocurrency is inevitable, like so many claim it to be.

"Web3 is revolutionizing financial technology and financial infrastructure in one, it allows any app, any website, to invent value in a digital economy without having to ask for permission or paying for that service."

CHRIS PACE
VP Product Marketing, Coincover

TECH TALK

Speech Title: DefiGram Powered by Empire Token — Elevating DeFi through an Empire of Use Cases

Abdullah gave a brief introduction on DeFI, its history and Empire's move to provide solutions to the existing problems of DeFi. He also explained how Decentralized Finance, subsequently, utilizes blockchain technology to solve the centralized authority problem in traditional finance, towards decentralizing control and operation.

"The origin of blockchain technology has resulted in a dynamic shift in financial and technological systems. This shift has resulted in how applications are developed and their fundamental structure in their operation."

ABDULLAH GHANDOUR
Founder and CEO, Empire

KEYNOTE

Seedon - Changing the way crowdfunding is seen today

Constantin gave an overview on Blockchain expansion outside the crypto space. He alsoexplained what impact can blockchain have on the crowdfunding sector and SeedOn's vision to expand the blockchain use into the crowdfunding space.

"Blockchain technology remains a quickly-growing area of growth for companies across a host of industries. It is possible that blockchain technology will ultimately be seen as the most important innovation to come out of the cryptocurrency boom."

CONSTANTIN-CLAUDIU MINEA
Co-Founder & CEO, SeedOn

FIRESIDE CHAT

Navin gave an overview of the current payment business structure and compared it with the future payment system that comes with the ongoing tech disruption.

He stated that fundamentally, payment has the main role to play to complete any transaction. It doesn't matter if it's a metaverse or a physical world.

The Future of Payments

"Companies will be able to accomplish greater output and growth by increasing the velocity of money, and blockchain will assist businesses in executing that."

PANELLIST:

NAVIN GUPTA
Managing Director of South Asia and MENA, Ripple

MODERATOR:

ANTTI ARPONEN

The key of digital mining IPFS & Filecoin - Created seven global No. 1

Jo-en briefed about IPFS and Filecoin and its advantages. She also explained how to correctly leverage these solutions and why often it trips users up in practice. There are nuances that need to be accounted for when using them directly or building services on top of them.

"The beauty of IPFS is that it doesn't require users to specify where data is but rather what data they're looking for, as long as there's at least one copy of the data being broadcasted to the network."

JO-EN CHANG
Chief Marketing Officer, The Joint Data and Cloud Service Group Co.

TECH TALK

Blockchain in a regulated world

Lars explained the potential implications of cryptocurrencies for global financial stability, and the distinctive nature of the underlying technology.

"The current state of regulation in the cryptocurrency and blockchain space leave many perplexed. With an uncertain road ahead, a unified regulatory framework for blockchain and cryptocurrency will be crucial to unlocking its full potential."

LARS SEIER CHRISTENSEN
Chairman, Concordium

TECH TALK

Blockchain and the Internet of Things: the IoT blockchain picture

The three fundamental properties of blockchain technology as a data structure that is., distribution, immutability and decentralization, can benefit the Internet of Things said Larry. He also mentioned how integration of IoT and blockchain opens the door for new possibilities that inherently reduce inefficiencies, enhance security and improve transparency.

"Conceptually, blockchain technology is a good match for IoT scenarios. IoT applications are by definition distributed and call for devices to interact directly with each other rather than via existing centralized models."

DR RAULLEN CHAI
Head of Strategy, Co-Founder, IoTeX

LARRY PANG
Head of Business Development and Ecosystem, IoTeX

TECH TALK

Katana Inu, Blockchain, NFTs, Future of blockchain and gaming

Marwan explained how gaming will be the first real use case for blockchain, revamping the industry and making games more immersive than ever. He also gave an overview on how gaming navigates the remaining hurdles and will become a case study for other industries considering mass blockchain adoption.

"In the case of the gaming industry, blockchain could become the norm for player experience, the transactions of digital items, and the back-end infrastructure of games themselves."

MARWAN HADDAD
CEO, Katana Inu

HAMZA SHAMSI
CAO, Businessman Blockchain Enthusiast, Katana Inu

PANEL DISCUSSION

NFTs and the future of the Metaverse

The panelists discussed that NFTs and the metaverse are synonymous because of the rapid growth in blockchain gaming, hence driving further growth by working towards a virtual world. In addition, real-life identities and digital avatars give direct access to the metaverse with the help of NFTs.

They also mentioned that amidst all the technological disruption, NFTs will disrupt the metaverse's traditional social network paradigm of user interaction, socialization, and transaction.

Startup World Cup – Regionals – Winner

World Blockchain Summit also provided top 10 startups a platform to exhibit their innovative capabilities in front of global investors at the Startup World Cup regionals. Thor Wallet DEX, an off-the-shelf non-custodial wallet to swap native crypto assets across chains and earn passive income on them, won the pitch slot at the 2022 Startup World Cup in San Francisco.

They will now get an opportunity to network with startups and investors at the Grand Finale of the Startup World Cup and pitch Thor Wallet DEX a US$ 1 Million investment prize.

TESTIMONIALS

"This is the first time we are attending World Blockchain Summit and so far we have received overwhelming response from the attendees. We have met a lot of business prospects who are looking to collaborate with us. It was a very good experience for us."

SDLC

"World Blockchain Summit is a good platform to the new comers to showcase their technology. Many investors and delegates have connected with us for our projects. It's a very good experience for us. We are able to explore our business very efficiently."

Blockaura

"The event is really good. We have got a lot of enquiries for our project. The speakers are very tech and topics being discussed are really good and informative."

Chingari

"We thought it would be a normal summit, but we are shocked to see so many blockchain figures, investors and companies participating in this summit. We are very grateful to be in this summit and we are planning to follow other editions of WBS. This is a good opportunity for Blatform to introduce to such huge audience. The agenda of the event is very good and the networking is very efficient."

ERTAN TURHAN
Blatform

"Im very excited to be in such an interesting event. In Dubai you have so much energy. So many brilliant minds have gathered here. The topics being discussed here today are very important and the importance will becomes more clearer in the years to come. The venue is amazing and all the organisation is really top notch. We have got a really good exposure here. We are very happy with everything."

ByBit

"Attending World Blockchain Summit was an obvious choice for us. We are meeting different people from all over the world and explaining them our project. We will find our business prospects here."

ALEX
Citadel one

"We have been to three events before and this is the best event. The quality of audience and the quality of the speakers is really nice. Especially the topics that are being discussed and we have participated in is web 3 technology and attention capital, I think it can change the world."

Paysenger

"We have been to three events before and this is the best event. The quality of audience and the quality of the speakers is really nice. Especially the topics that are being discussed and we have participated in is web 3 technology and attention capital, I think it can change the world."

* The 22nd global edition of World Blockchain Summit is being held under the patronage of HH Sheikh Juma Ahmed Juma Al Maktoum, a member of the ruling family of Dubai.

* The summit will provide a common platform to global crypto leaders, blockchain gurus, pre-qualified investors, government representatives, crypto enthusiasts, and media outlets.
